Step 1 — Case

- Unscrew the two 7.35mm Torx T6 screws.

Step 2

- Using the flat end of the spudger, carefully pry the black cover on the top from the blue front cover.

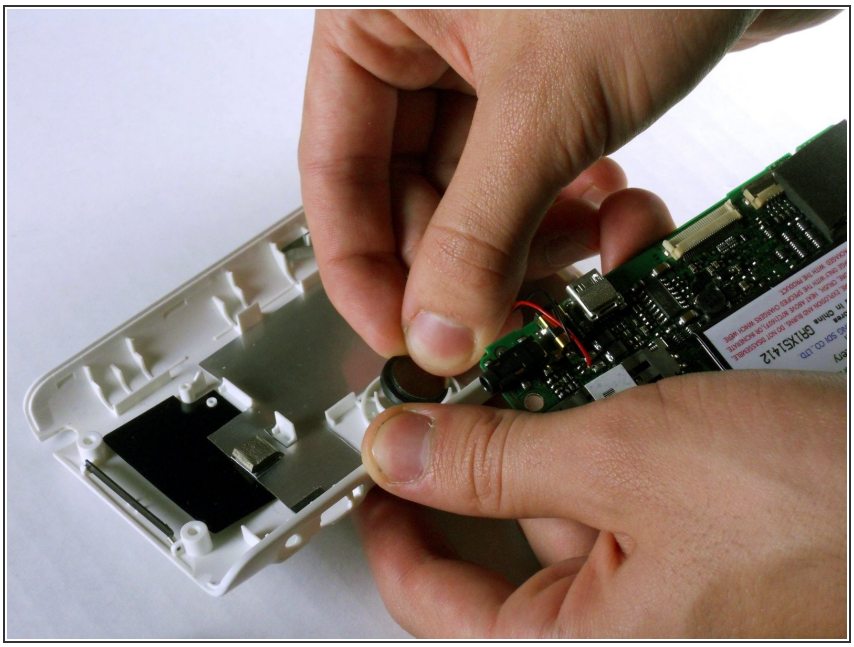
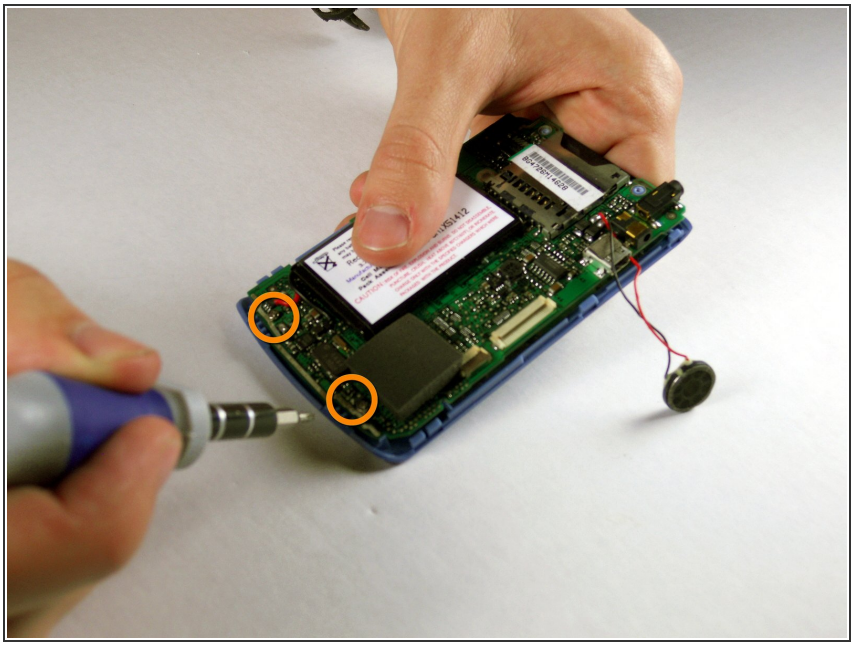
Step 3



- Carefully remove the speaker from the back white cover by just pulling it gently. It is glued on.

Step 4



- Unscrew the #00 5.75mm Phillips screws from the bottom of the motherboard. The front blue panel should fall right off.

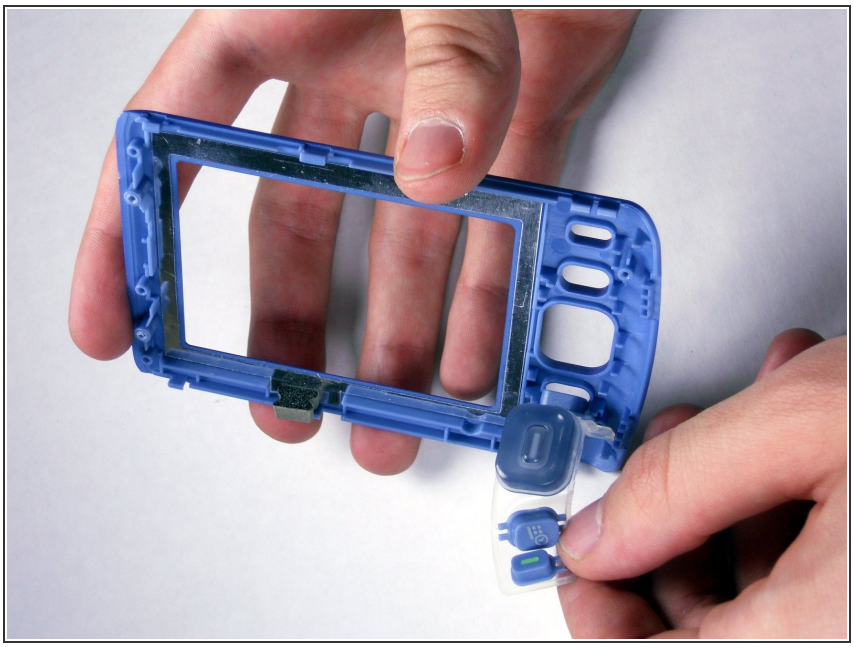
Step 5 — Keys



- The blue keys will either come off with the blue front case, or stay on the motherboard.

To reassemble your device, follow these instructions in reverse order.
