

Motorola Moto G4 Play Screen Replacement

Before you begin, download the Rescue and Smart...

Written By: Michael Cottone

INTRODUCTION

Before you begin, download the [Rescue and Smart Assistant](#) app to backup your device and diagnose whether your problem is software or hardware related.

TOOLS:

[Tournevis cruciforme #00](#) (1)

[Spudger \(spatule antistatique\)](#) (1)

[Pincettes de précision](#) (1)

Step 1 — Remove back plate

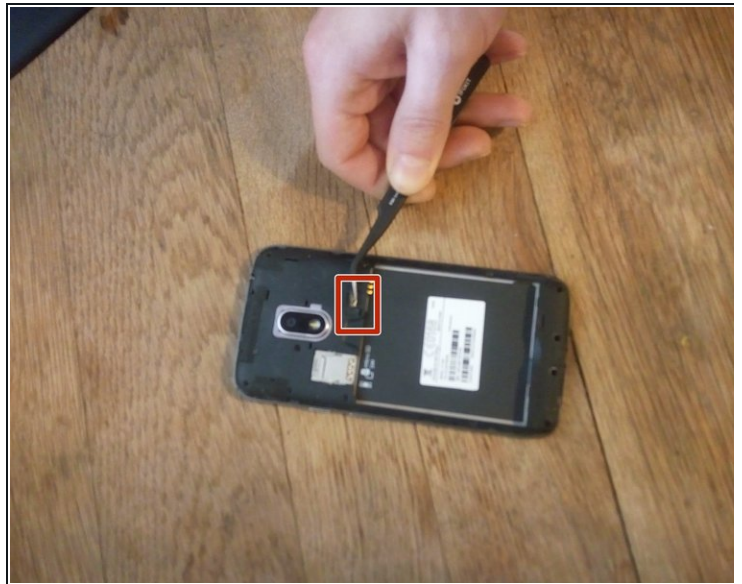

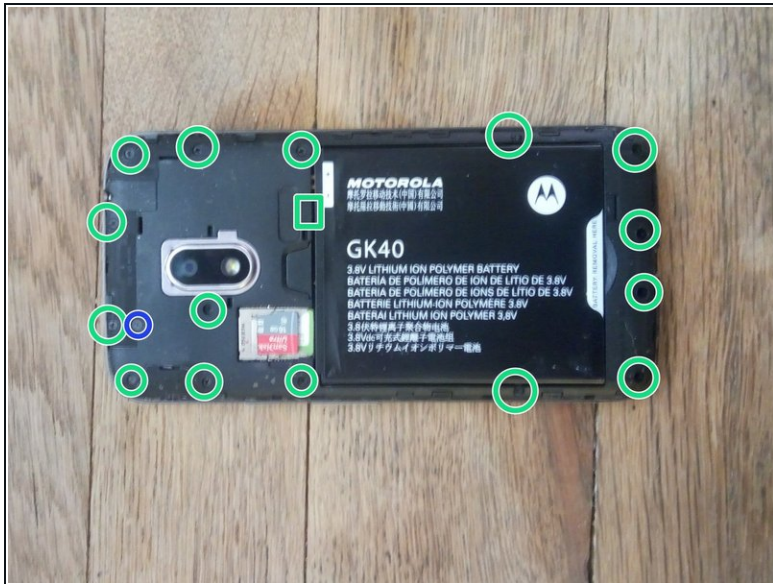

- Remove back plate starting with this tab

Step 2

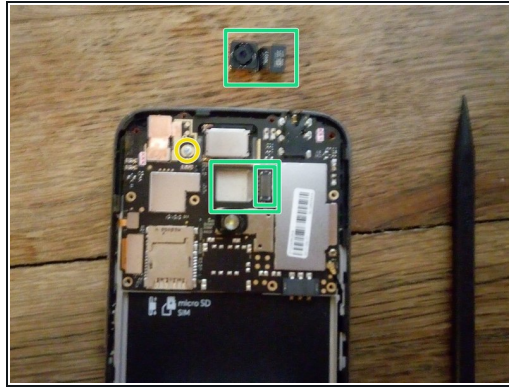

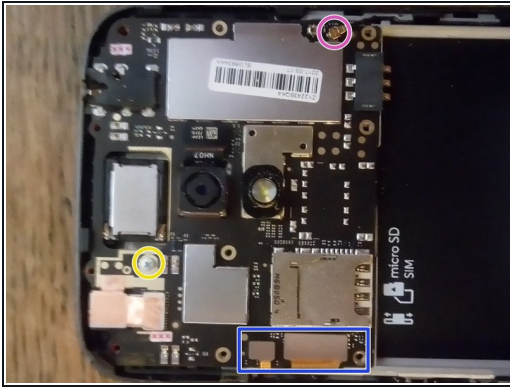

- remove battery
- remove SD card and sim card

Step 3 — remove screws and inner back plate

- remove 16 phillips 00 screws
 - the two screws on either side of the battery (red color on thread) are shorter than the other screws (blue color on thread)
- don't forget this one hiding underneath this sticker
- no screw here
- remove the inner back plate

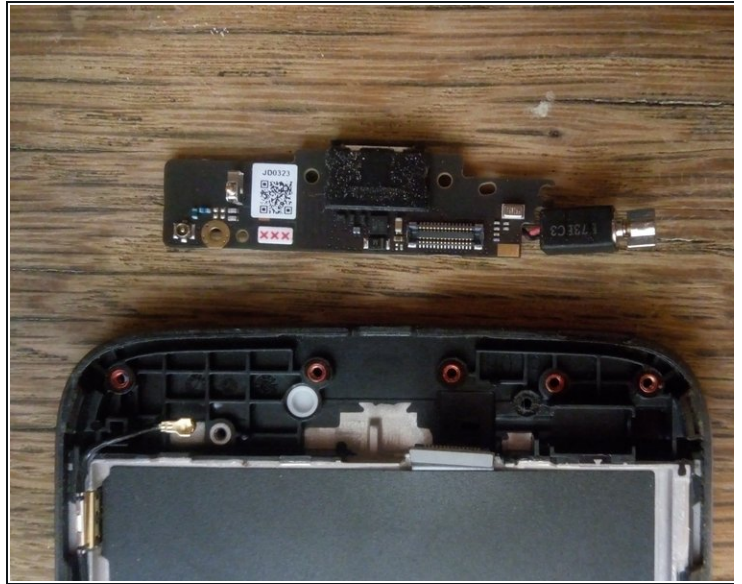

Step 4 — Remove the motherboard

- disconnect antenna cable from motherboard with a spudger.
- disconnect screen and digitiser cables with a spudger.
- remove rear facing camera with a spudger
- remove phillips 00 screw
- Remove motherboard. this cable is still connected, you must disconnect it as you remove the motherboard.

⚠ There is a cable attached to the bottom of the motherboard, be careful when removing it

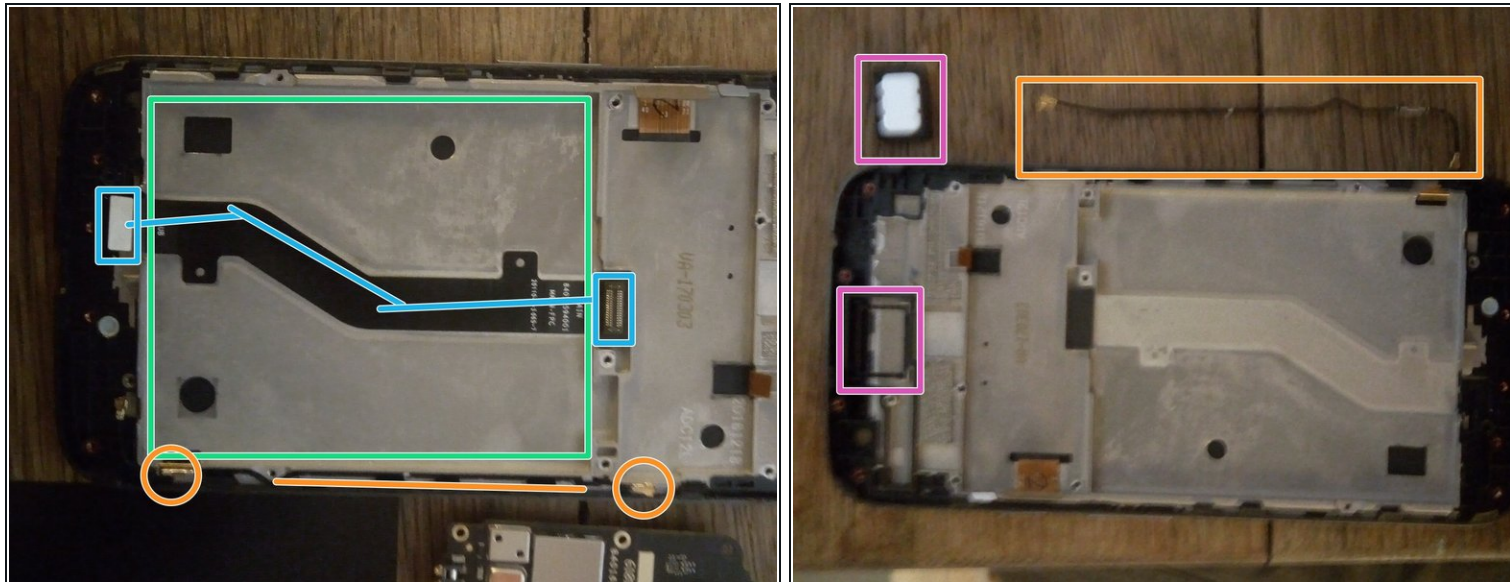

Step 5 — Remove USB accessory board

- disconnect antenna and data cable
- remove philips 00 screws
- Remove usb board and vibrator together.

⚠ vibrator is attached to usb board from the bottom, be careful and remove them together to prevent damage.

Step 6 — Remove remaining components from screen assembly

- Peel off black sticker under battery compartment.
- peel off data cable
- remove antenna wire
- remove speaker

To reassemble your device, follow these instructions in reverse order.
