INTRODUCTION

This guide will show you how to remove and replace the laptop's CD/DVD Drive. This may be necessary if your drive suffers some sort of hardware failure such as not ejecting or the inability for it to read disks.

🔧 TOOLS:

- T5 Torx Screwdriver (1)
- Spudger (1)

Step 1 — Back Case

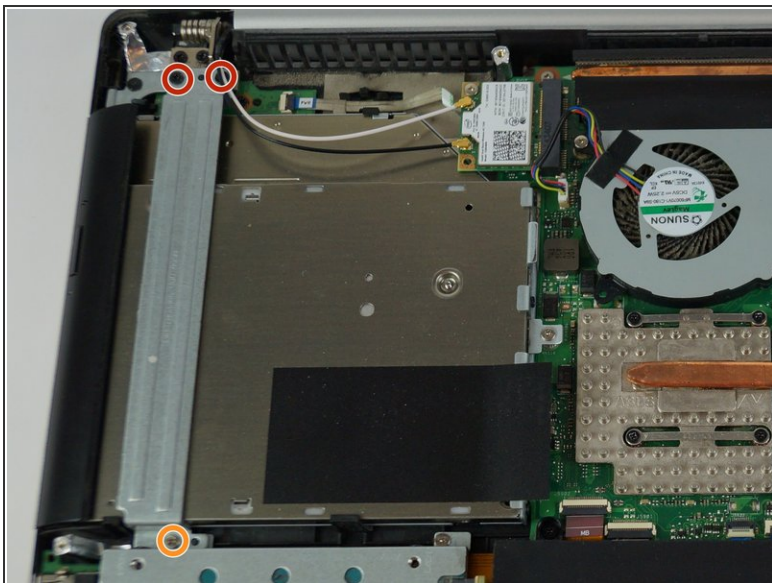

- Turn the laptop off and unplug all cables.

- Flip over so the bottom is facing you.

- Remove the ten 3mm Torx T5 screws from the bottom cover.

| |

Step 2

- Use a spudger to wedge between the laptop and bottom cover—lift upwards to pry open.

- Run the spudger along the perimeter of the bottom cover to remove.
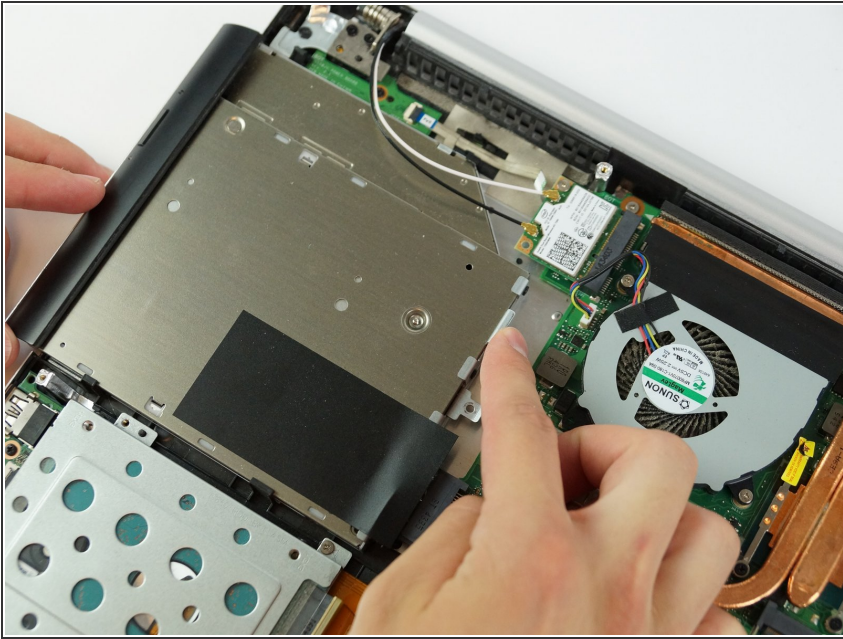

Step 3 — CD/DVD Drive

- Remove the two 4mm black Phillips #1 screws from the top of the CD/DVD bracket.

- Remove the single 4mm silver Phillips #1 screw from the bottom of the CD/DVD bracket.

- Remove the CD/DVD bracket.

Step 4

- Remove the single 4mm silver Phillips #1 screw.

Step 5

- Slide the drive out of the laptop using both hands.

To reassemble your device, follow these instructions in reverse order.
