Step 1 — Back Case

- Remove all 14 of the 4 mm screws on the back side of the laptop with a Phillips #1 screwdriver.
Step 2

- Gently pull out the battery.

Step 3

- Lift up in the spaces left by the battery to create a gap between the back case and the laptop body.

- Run a spudger along both sides of the laptop to widen the separation and release the clips holding the back case on.

- Remove the back case.

Step 4 — RAM

- Locate the RAM. The RAM will be covered by a black protective plastic. Once it is located, the protective plastic will be lifted up exposing the RAM.
