

# Replacing your video card.

Written By: Lance Donadel

# INTRODUCTION

[video: <https://www.youtube.com/watch?v=F1WzTiGdNU0>]

## Step 1 — Step 1

- Make sure power is off, and remove the side panel.

## Step 2 — Step 2

- Remove the screws that hold the GPU in on the rear bracket.

### Step 3 — Step 3

- Unlock the PCI-e slot chip.

### Step 4 — Step 4

- Remove the GPU by gently pulling on the card.

## Step 5 — Step 5

- Hover the new GPU over the PCI-e slot.

## Step 6 — Step 6

- Push down on the card to slide the connector into the slot.

## Step 7 — Step 7

- Ensure that the secure locks click into place.

## Step 8 — Step 8

- Screw the rear bracket down to secure the card to the chassis.

## Step 9 — Step 9

- Reconnect any required GPU cables.

## Step 10 — Step 10

- Reattach the side panel.

You're finished!
