

# Sceptre X9 Komodo VII Power Supply Unit Replacement

Use this guide to remove the power supply unit.

Written By: Jose Carrillo

---

## INTRODUCTION

Use this guide to remove the power supply unit.

---

### TOOLS:

- [Phillips #2 Screwdriver](#) (1)
-

## Step 1 — Stand

- Place the monitor face down.
- Remove the four 11.5mm screws with a #2 Phillips screwdriver.
- Remove the stand by pulling it out.

## Step 2

- Remove two 11.5mm screws with a #2 Phillips screwdriver.
- Remove the plastic bar.

### Step 3 — Board Cover

- Using a #2 Phillips screwdriver, remove the six 7mm screws at the circled locations.

### Step 4

- Pry the monitor using the plastic opening tool to release the clips holding the cover on.
  - ⓘ There are four clips on each side, four on the top, and one on the bottom.
  - ⓘ You may hear a loud snapping noise when releasing the clips. Do not be alarmed, it is natural.
- Once all the clips have been released, remove the cover by pulling it up.

## Step 5

- Using the #2 Phillips screwdriver, remove the one 6mm screw.
- Unplug the indicated cable by pulling on the base.
- Slide the cover toward the top of the monitor.
- Remove the cover.

## Step 6 — Power Supply Unit

- Using a #2 Phillips screwdriver, remove the two 4.72 mm Phillips screws that hold the power adapter in place.

## Step 7

- Unplug the seven connections from the power supply unit by gently pulling on them.

## Step 8

- Using a #2 Phillips screwdriver, remove the screws and the wire that is attached to the ground.
  - Four 6 mm Phillips screws
  - One 8 mm Phillips screw

## Step 9

- Lift the power supply unit straight up to remove it from the back panel.

To reassemble your device, follow these instructions in reverse order.
