Step 1 — Introduction
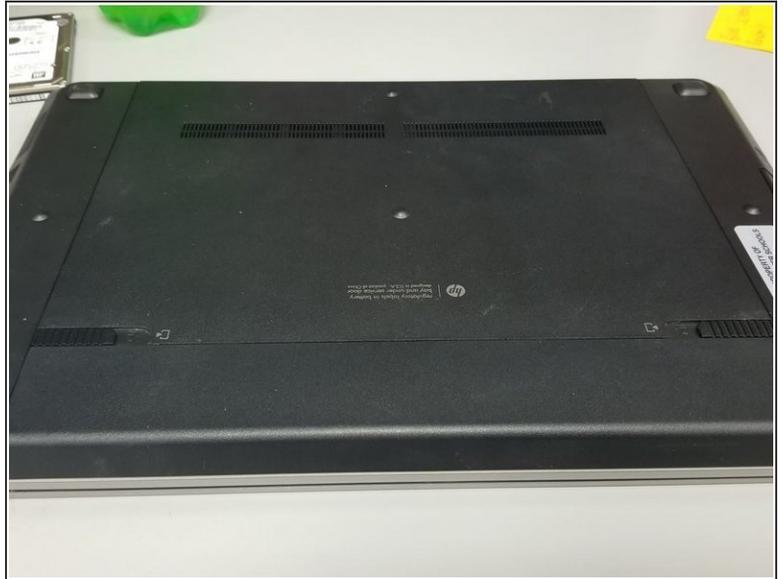

- Start by flipping over the laptop onto its back.

Step 2 — Battery Removal

- Press inward on the two switches.

- The battery should pop out slightly.

- Remove the battery.

## Step 3 — Back Panel Removal

- Press inward on both switches while pushing the center panel away from you. It should slide slightly backwards.

- Release the switches.

- Slide the panel the rest of the way out.

Step 4 — Removing HDD

- Unscrew the four screws located on the edges of the base.

- Lift enough on the right side of the HDD to make it over the plastic paneling.

- Pull outward.

Step 5 — Removing HDD from Base
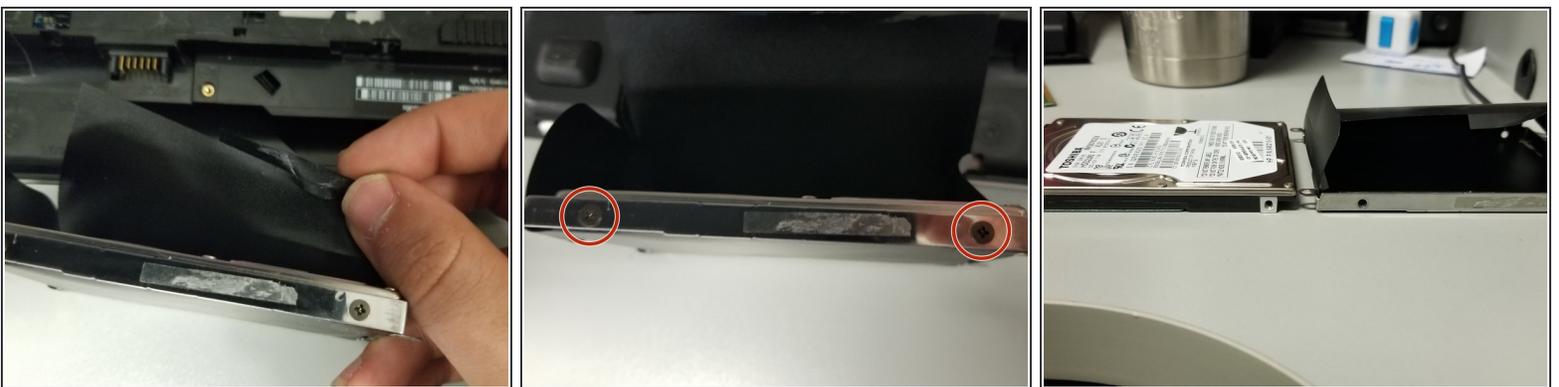

- Remove the adhesive from the protective covering over the HDD.

- Remove the four screws around the edges of the metal base.

- Pull out the HDD from the base.
