Step 1 — Back panel

⚠️ Be sure to unplug the device before proceeding.

● Use a Phillips #0 screwdriver to remove the four 21.7mm screws holding the back panel to the frame.

This document was generated on 2020-11-13 02:36:08 PM (MST).

Step 2
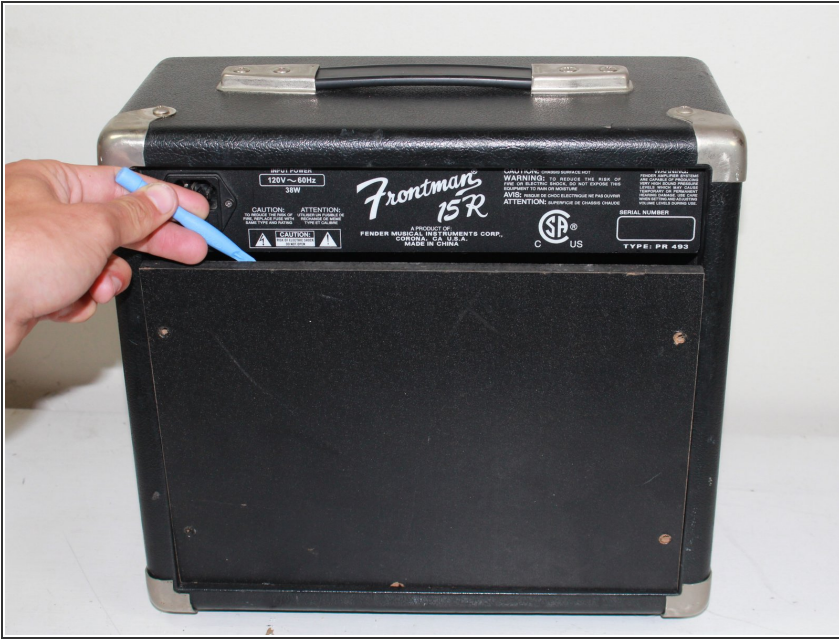

● Once the screws are out, use a plastic opening tool or spudger to pry the top of the back panel open. There may be some resistance, but it will eventually pry loose.

Step 3

● Once the top is separated, use your hand to remove the back panel from the unit.

To reassemble your device, follow these instructions in reverse order.
