## INTRODUCTION

If you are having an issue with your device not charging, access and replace the Micro USB charging port using this guide.

---

### TOOLS:

- [Magnetic Project Mat](#) (1)
  - [4mm Nut Driver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Phillips #1 Screwdriver](#) (1)
  - [Phillips #0 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — External Panels

- Remove external rubber cover.

## Step 2

- Use blue plastic opening tool to remove the external speaker face by placing it in the slight opening at the bottom.
- Use a lever motion, push the tool down, lifting the speaker face.
- Use fingers to grip and remove speaker face.
- Repeat on reverse side to remove the second speaker face.

### Step 3

- Orient speaker so volume buttons are facing away from you, and Bluetooth and power buttons are on the left-hand side.
- Remove the seven 14mm screws using the Phillips #1 screwdriver.

### Step 4

- Reorient speaker so Bluetooth and power buttons are now on the right-hand side.
- Separate the two panels along the crease.
  - Blue plastic opening tool may be needed to separate panels.
- Remove the panel with no buttons to expose internal area of the device.
- ★ Motherboard and all internal components are under this panel.

## Step 5 — Micro USB Port

- Remove the plastic piece containing the Micro USB port from its designated slot, found below the speakers.

## Step 6

- Detach both the wires connecting the Micro USB piece to the motherboard.

## Step 7

- Remove the two 10mm screws using the Phillips #0 screwdriver.

## Step 8

- Remove the small black plastic piece that was held in place by the two 10 mm screws and covers the Micro USB port.

## Step 9

- Use the black plastic spudger to lightly push the Micro USB piece out of the external plastic piece.

To reassemble your device, follow these instructions in reverse order.
