

Acer Aspire 5534-1146 Screen Replacement

Screen Replacement on Acer Aspire 5534-1146.

Written By: Trysten buckley

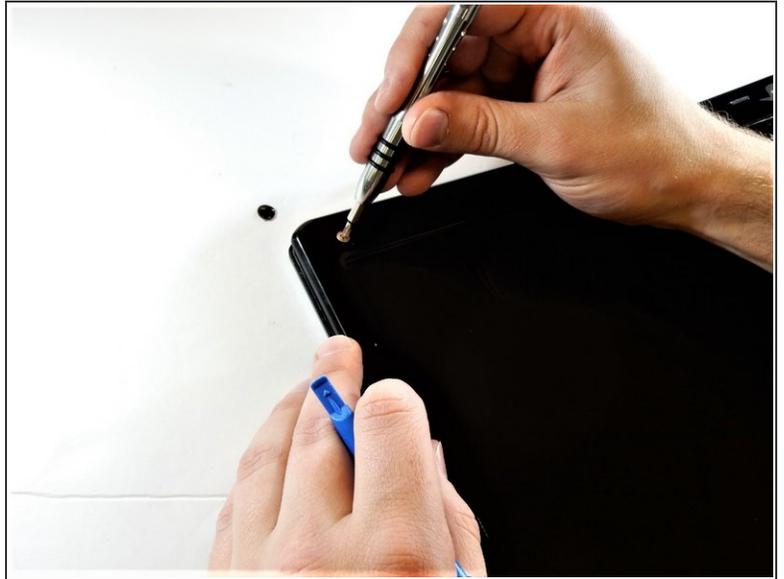

INTRODUCTION

This repair guide will give you a step-by-step procedure on how to replace the screen on your Acer Aspire 5534-1146 device.

TOOLS:

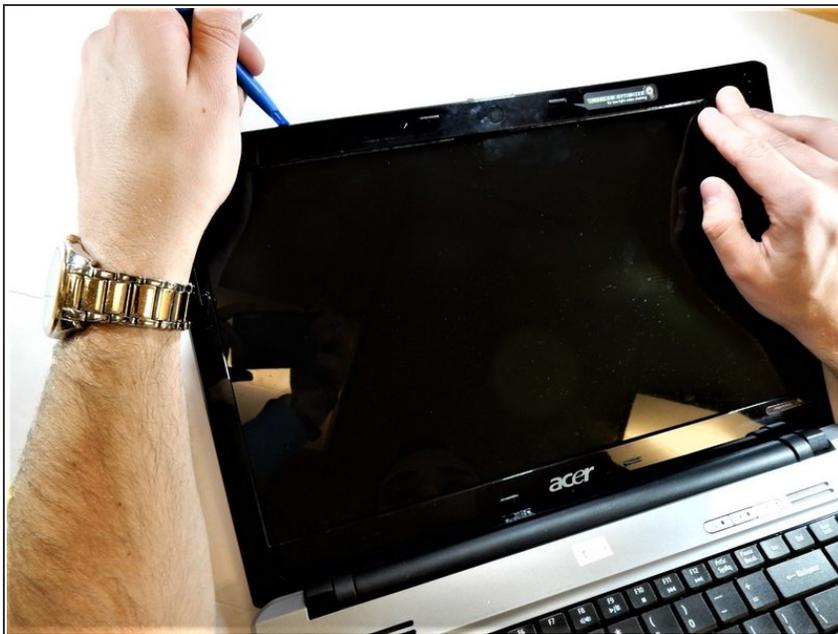

- [Phillips #0 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Screen

- Use the blue spudger to remove the 4 rubber supports from each corner of the screen.
- After use a PH0 screw bit to remove the corresponding screws underneath.

Step 2

- Use a plastic opening tool to carefully release the plastic clips that hold the plastic frame to the back cover.
-  Be careful while handling the bottom, there are cable connections and you don't want to damage them.

Step 3

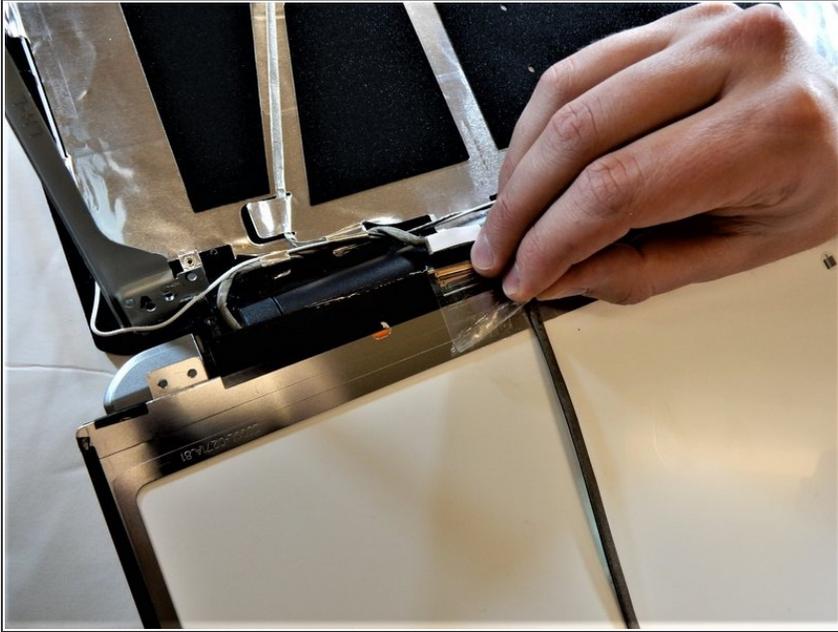

- Gently disconnect the camera cable.

Step 4

- Remove the 4 screws in the corners underneath the plastic frame that was removed. Screen should then be able to come off the frame.

Step 5

- Take the screen lay it face down on top of the keyboard.
 - Unplug the cable that is connected to the video card.
-  This cable may be taped down to the back of the screen, if necessary lift the tape gently.

Step 6

- Remove the tape, and unplug the display cable on the back of the screen.
- Pull the tape off of the cable from the back of the screen, and now the screen should be free to come off. You are now ready to install a new one.

To reassemble your device, follow these instructions in reverse order.
