

Hover-1 Folding E-Scooter Rear Wheel Replacement

How to repair the Hover-1 Folding E-Scooter Rear Wheel.

Written By: Luke Imai

INTRODUCTION

This guide is created to replace a damaged or broken back wheel. Tools required are a Hex Bit 4.0 tool, a bit extender, and an allen key.

TOOLS:

- [4 mm Bit Extension](#) (1)
 - [4 mm Hex Key](#) (1)
-

Step 1 — Rear Wheel

- Remove either of the two 0.2 mm axle screws by using a hex bit 4.0 by turning clockwise.
- i** The two screws are the same thread so find the screw that has the least torque. Only that screw will be able to removed in this step.
- ★** Turn the hex bit 4.0 counterclockwise to reassemble the axle screws.

Step 2

- Slide off the plastic side panel.

Step 3

- Use a hex bit 4.0 to screw back in the 0.2 mm screw as tightly as possible by turning clockwise.
- ⓘ You will need to hold the other screw you are not replacing with an additional hex bit 4.0, so that the screws don't spin freely.

Step 4

- Flip over the scooter and use the hex bit 4.0 to remove the other 0.2 mm screw.

Step 5

- Slide off the other plastic side panel.

Step 6

- On the same side you removed the screw, use the bit extender to push down on the axle inside the wheel.
- ⓘ The axle pops out and the wheel easily comes off.
- ⓘ Two washers will pop out with the axle.

To reassemble your device, follow these instructions in reverse order.
