Step 1 — Back Cover

- Remove the 12 5mm Phillips #00 screws.

- Use a plastic opening tool to gently pry open the back panel.

- Gently lift up the back panel, exposing the internals of the laptop.
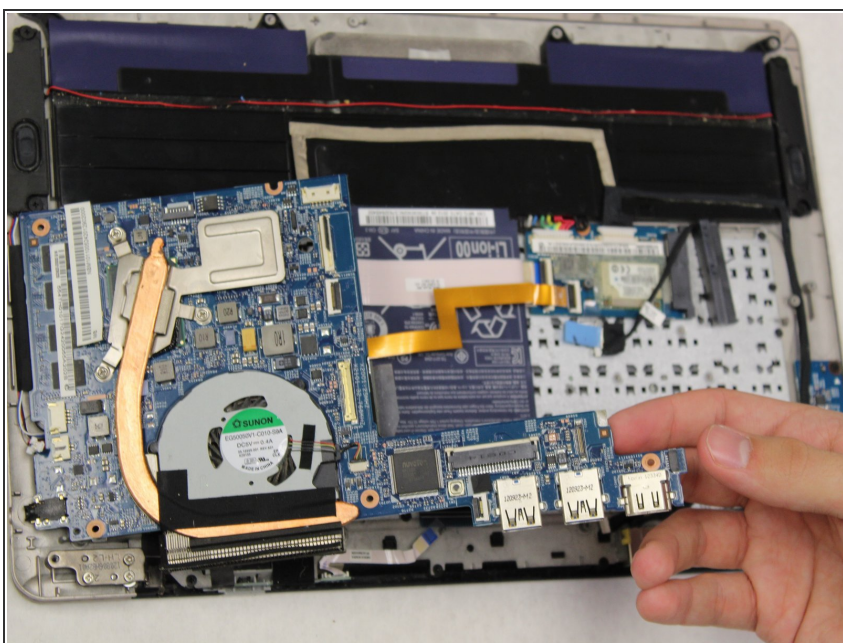

Step 2 — Motherboard

- Remove the motherboard connector cables by gently lifting the black latch that clamps them in place with a spudger or simply pull the connector from the port.

Step 3

- Remove the 5 5mm PH0 screws holding the motherboard in place.

- Gently remove the motherboard from the chassis.

Step 4

- Gently remove the motherboard.

To reassemble your device, follow these instructions in reverse order.
