

# Apple EarPods Disassembly

Can't hear sound? Disassemble your EarPods and clean both inside and out.

Written By: Eduardo Gonzalez

---

## INTRODUCTION

Use this guide to help you optimize audio function from your Apple EarPods.

---

### TOOLS:

- [Cotton Swab](#) (4)
  - [Isopropyl Alcohol](#) (1)
  - [X-Exacto Knife](#) (1)
  - [Triangle Paddle](#) (1)
  - [tweezer](#) (1)
-

## Step 1 — Tools You Need

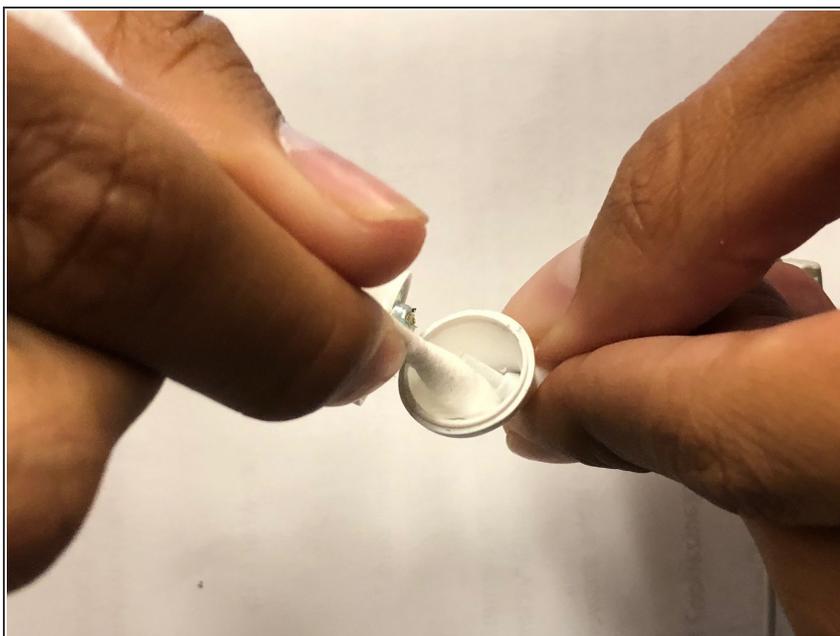

- X-ACTO Knife
- Tweezer
- Triangle Paddle
- Alcohol
- Cotton Swabs

## Step 2 — Opening Earpod

- Using a triangle paddle, apply sufficient pressure to get in-between the opening section

## Step 3 — Cleaning Inside and Out

- Soak one side of a cotton swab with alcohol
- Clean inner and outer pod using swab soaked in alcohol

## Step 4 — Cleaning the Speaker Cone

- Carefully clean the speaker cone using cotton swab
- Once clean, reattach the earbud

## Step 5 — Removing the Grill

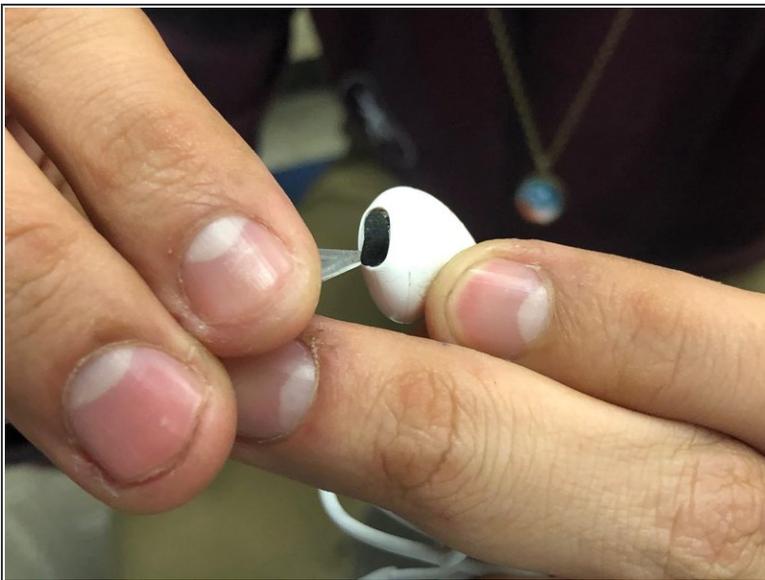

- Carefully remove grill out of both earbuds using tweezers
- Take precautions not to bend grill excessively

## Step 6 — Grill Polishing

- Clean grill with cotton swab soaked in alcohol
- Remove any build up of wax or sweat

## Step 7 — Placing Grill Back

- Once the grill is clean, place the grill back inside of the apple earbuds

To reassemble your device, follow Step 7, Step 4 and Step 2 instructions in reverse order.
