INTRODUCTION

If the battery appears to be working, and the device charges normally when sitting on the charging stand, but does not charge when connected to a USB cable, you may need to replace the Micro-USB Port. Here we have included a step-by-step guide for the replacement of the Port.
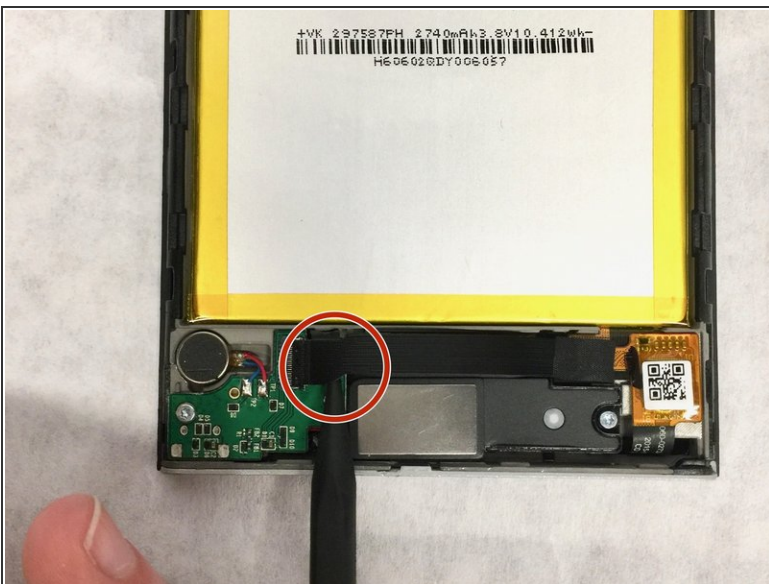

🔧 TOOLS:

- Spudger (1)
- iFixit Opening Tools (1)
- T5 Torx Screwdriver (1)

Step 1 — Micro-USB Port

- Follow Step 1 on [Battery Replacement Guide](#) to remove the back panel of the device.

Step 2

- Insert the tip of the nylon spudger under the black flap, and pull upwards toward yourself to disconnect it.

⚠️ Be careful, as the flap can easily break off.

Step 3

- Using the T-5 bit, unscrew the three 5mm screws, two attached to the green board, one attached to the black board.

Step 4

- Using the nylon spudger, remove the silver cylindrical component followed by the green then black components

⚠️ Be careful not to break the wires that are holding the three components together.

To reassemble your device, follow these instructions in reverse order.
