

Razer Blade RZ09-0102 Keyboard Keys Replacement

This guide will show you how to remove and replace missing or broken keys on your keyboard.

Written By: Nicole Schukow

INTRODUCTION

Removing keys is necessary to do cleaning and some maintenance on your keyboard. You may also need to replace a broken or missing key. Another possibility is to upgrade the keyboard or customize it to personal preference.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Keyboard Keys

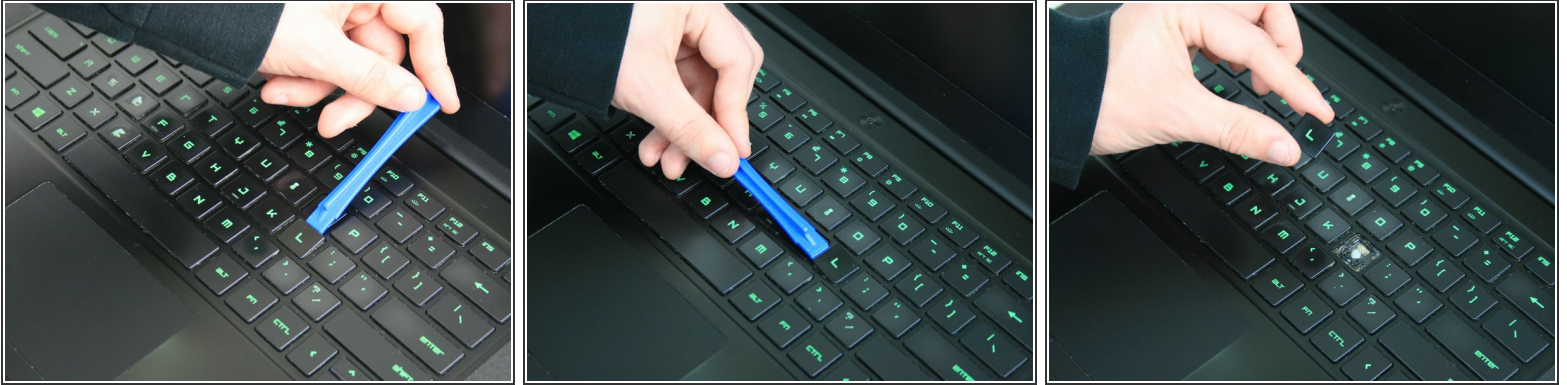

- Open the laptop.

Step 2

- Using the opening tool insert underneath key.

Step 3

- Pry up on the key until it pops off, you may need to try prying from multiple sides of the key.

 A popping sound will occur

To reassemble your device, follow these instructions in reverse order.
