INTRODUCTION

A common problem you may have with the Samsung Galaxy Core Prime is a sticky or broken home button. Rather than go somewhere to fix it you can use this guide to help you remove or readjust the button. You will need tweezers, a heat gun or hair dryer, a Phillips #00 screwdriver, and an iFixit Opening Tool.

🔧 TOOLS:

- Heat Gun (1)
- iFixit Opening Tools (1)
- Tweezers (1)
- Phillips #00 Screwdriver (1)

Step 1 — Battery

- Turn the smartphone off by using the power button on the right-hand side.

Step 2

- Turn the smartphone over so that the rear camera is face up.

Step 3

- Use your fingernail or a flat tool to lift the back cover.

Step 4

- Locate the battery near the bottom of the phone. The battery is square, flat, and is labeled 'SAMSUNG'.

Step 5
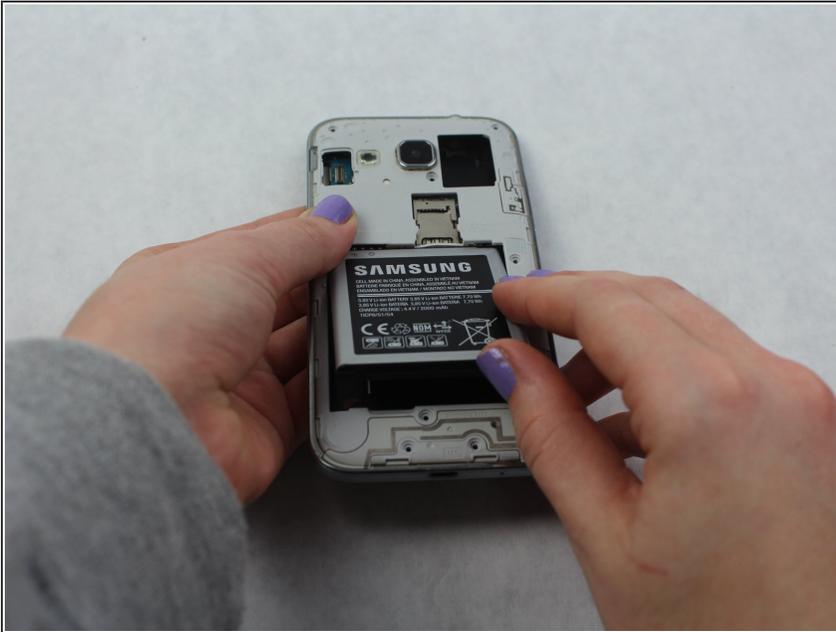

- Use your fingernail or a flat tool to lift the battery out.

Step 6 — Home Button

- Use your thumb to remove the sim card.

Step 7
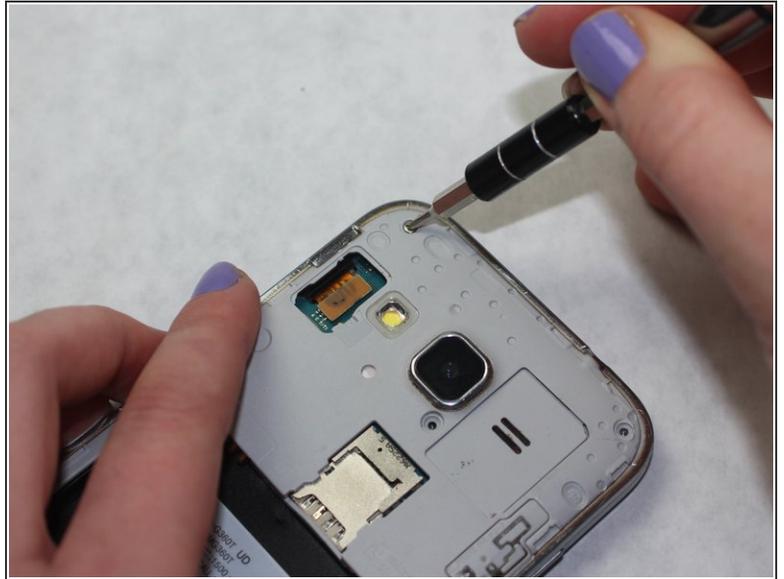

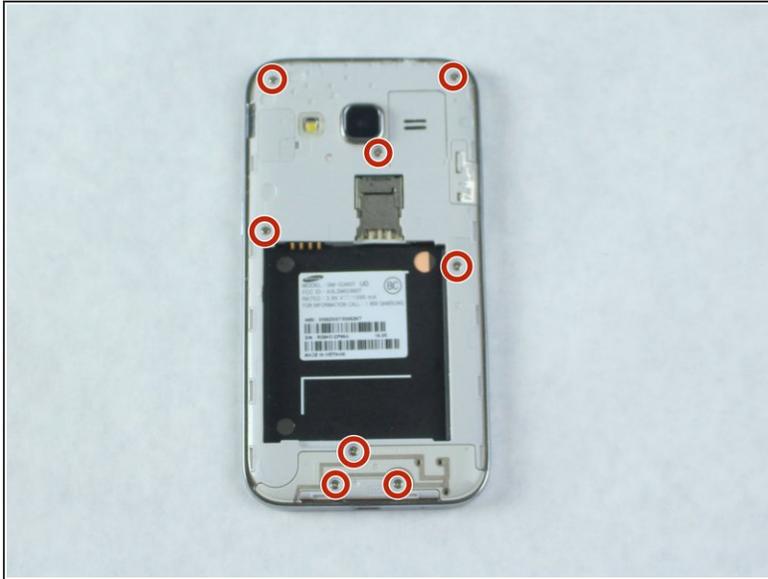

● Use a Phillips #00 screwdriver to remove the eight 4 mm screws that secure the midframe.

Step 8

● Heat the frame with a hair dryer or heat gun. Do this until the adhesive is loosened.

⚠ Take care when using these heating tools.

Step 9
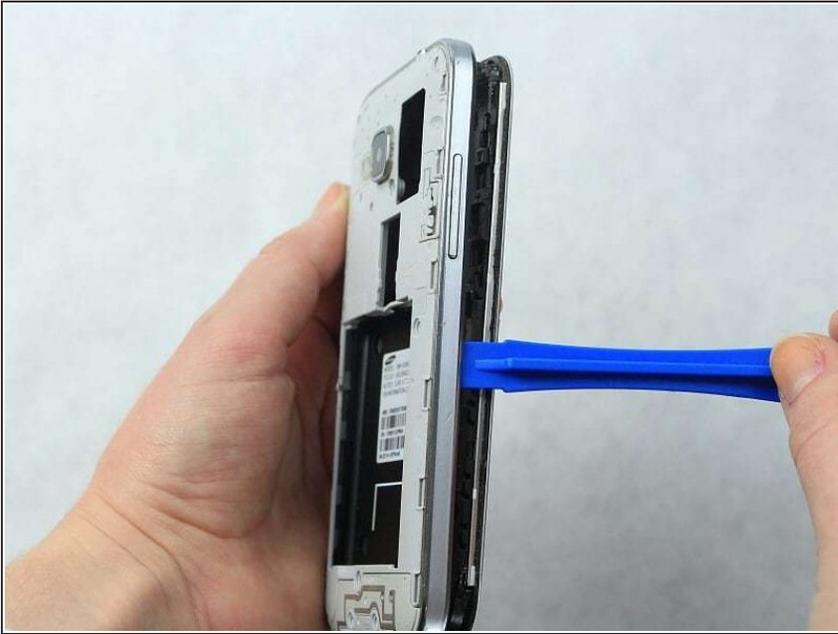

- Use a flat tool or the iFixit Opening Tool to lift the midframe.

Step 10
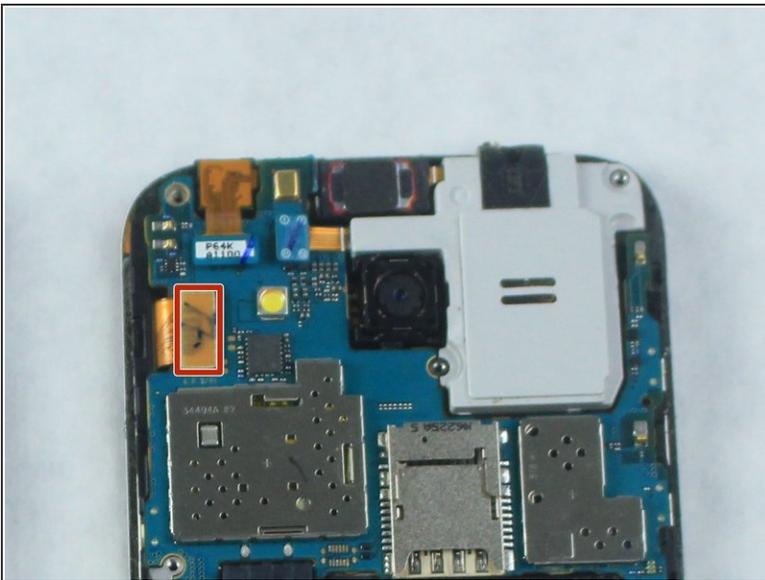

- Disconnect the LCD screen/touch screen ribbon from the motherboard using tweezers.

Step 13

- Use the iFixit Opening Tool to remove the plastic panel that separates the motherboard and the screen.

Step 14
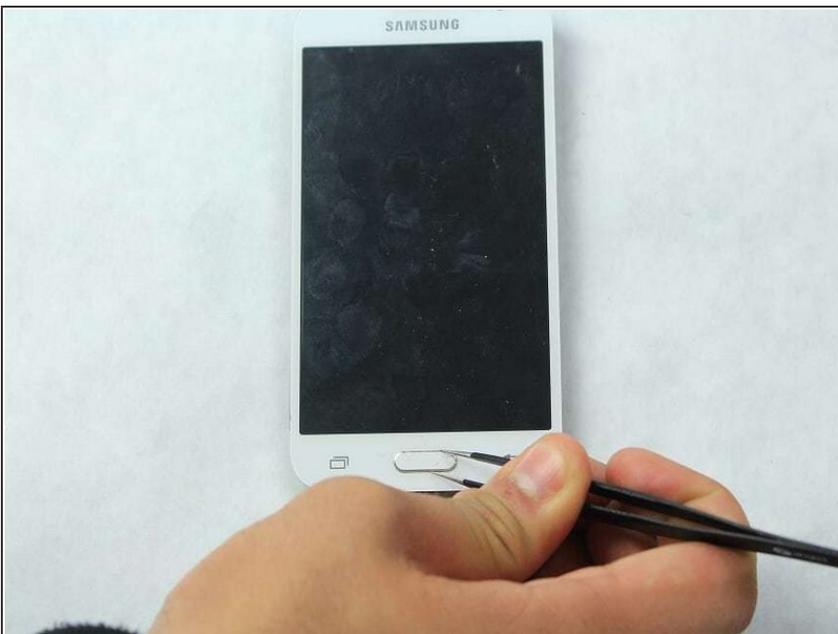

- Use tweezers to remove the home button.

To reassemble your device, follow these instructions in reverse order.
