INTRODUCTION

Having trouble with your headphones or USB ports? The Input/output board may be the source of your problem. Here is a quick an easy guide to replace your IO board, and get your devices working again!
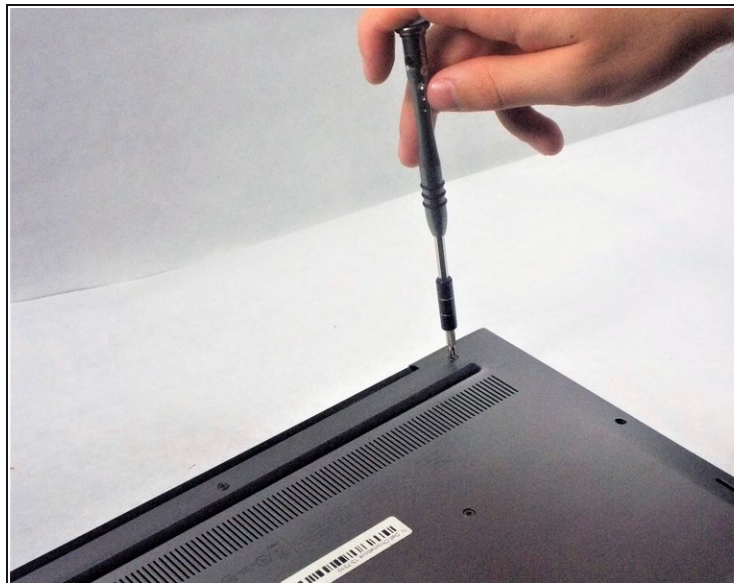

🔧 TOOLS:

iFixit Opening Tool (1)
Phillips #0 Screwdriver (1)
Phillips #1 Screwdriver (1)
Spudger (1)

⚙️ PARTS:

Dell Chromebook 13 7310 I/O Board - TTX96 (1)

Step 1 — Back Cover

- Remove the eleven 3mm Phillips #1 screws.

Step 2

- Use a plastic opening tool to gently remove the back panel.

- (i) It can be easier to pry open near a corner.

Step 3 — Battery

- Use your fingers to remove the connecting cable to the battery unit. Firmly grab the cord closest to the motherboard connection and pull straight back.

Step 4

- Remove the four 2mm screws on the sides of the battery.

Step 5

- To remove the battery, lift up on one side to get your fingers underneath and lift away.
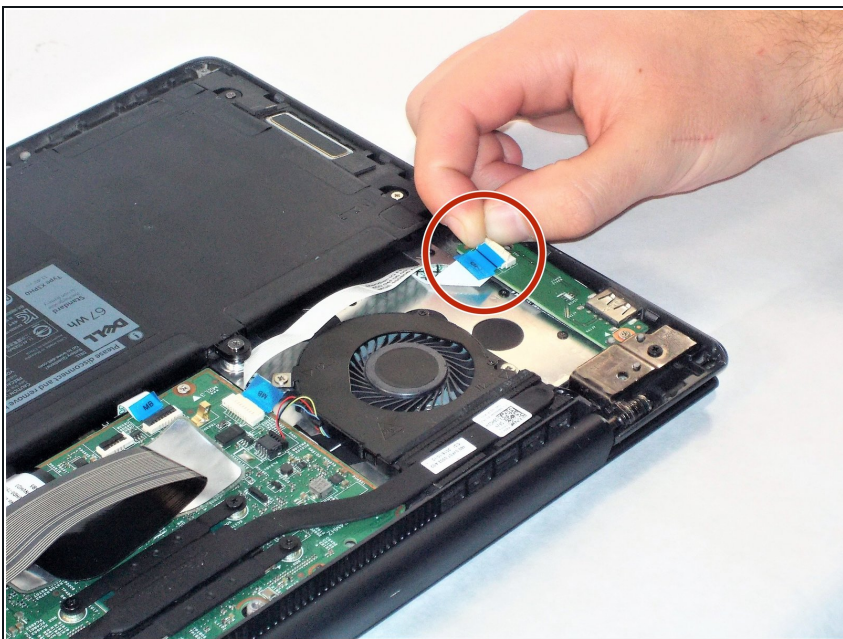

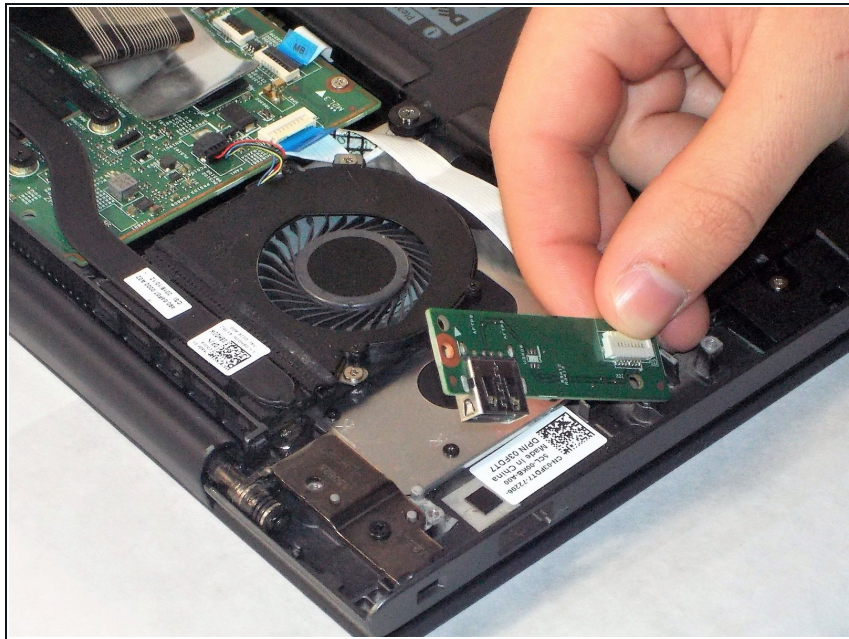

Step 6 — IO Board

- Remove the single 2mm screw securing the IO board to the laptop.

Step 7

- Pull up on the connector to release the IO board cable from the motherboard.

(i) It may be easier to pull from the blue tab.

● Remove the IO board.

To reassemble your device, follow these instructions in reverse order.
