# Udi Discovery U818A FPV Controller Battery Replacement

How to replace the controller battery of a Udi Discovery U818A FPV drone.

Written By: Raghda Al-Hmeyrat

INTRODUCTION

This guide will show you how to replace the battery of your Udi U818A FPV drone controller. You will need a JIS #0 screwdriver to complete this task.

🔧 TOOLS:

- JIS #0 Screwdriver (1)

www.iFixit.com

Step 1 — Controller Battery

- Turn the remote control over so that the buttons and joysticks are facing downward.
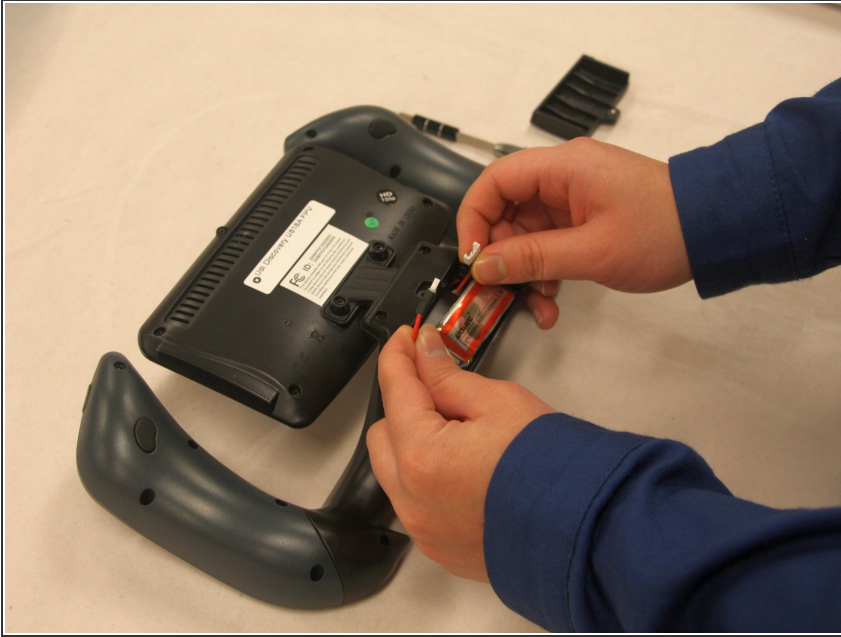

Step 2

- Using a JIS #0, unscrew the silver 4mm screw that holds the battery cover in place.

Step 3

- Open the battery access panel.

- Disconnect the red and black wires.

- Remove the depleted battery.

To reassemble your device, follow these instructions in reverse order.
