INTRODUCTION

Use this guide to replace the hard drive in your device.

🔧 TOOLS:

- Phillips #1 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — HDD/SSD

- Lift up the rubber tab located in the upper-right corner of the backing plate.

Step 2

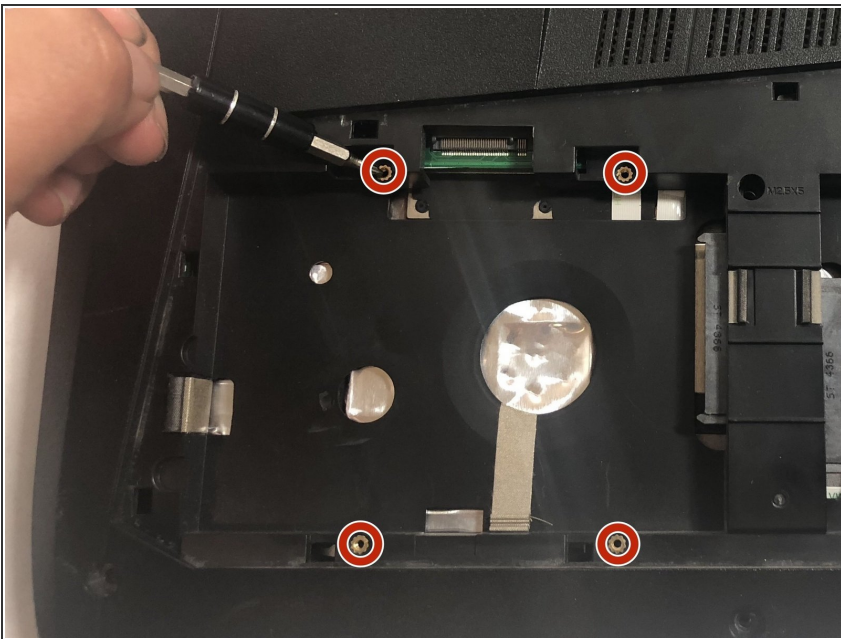

- Use a Phillips #1 screwdriver to remove the 5.2 mm screw behind the rubber tap.

Step 3

- Carefully pull the backing plate off. If you have a pry tool, you can pry on the edges carefully.

Step 4

- Use a Phillips head screwdriver to remove the four 2.4 mm screws from the hard drive mount.

- Remove the hard drive from the device.

To reassemble your device, follow these instructions in reverse order.
