

Sony Vaio VPCF2390X Hard Drive Replacement

This guide is useful if you are needing to take...

Written By: Erin Huene

INTRODUCTION

This guide is useful if you are needing to take out your hard drive and replace it with a new one. The steps are very basic, and require you to only take out several screws. This is a guide that anyone with any background knowledge of laptop repairs can take part in. There are no special requirements or hazards while performing this action.

TOOLS:

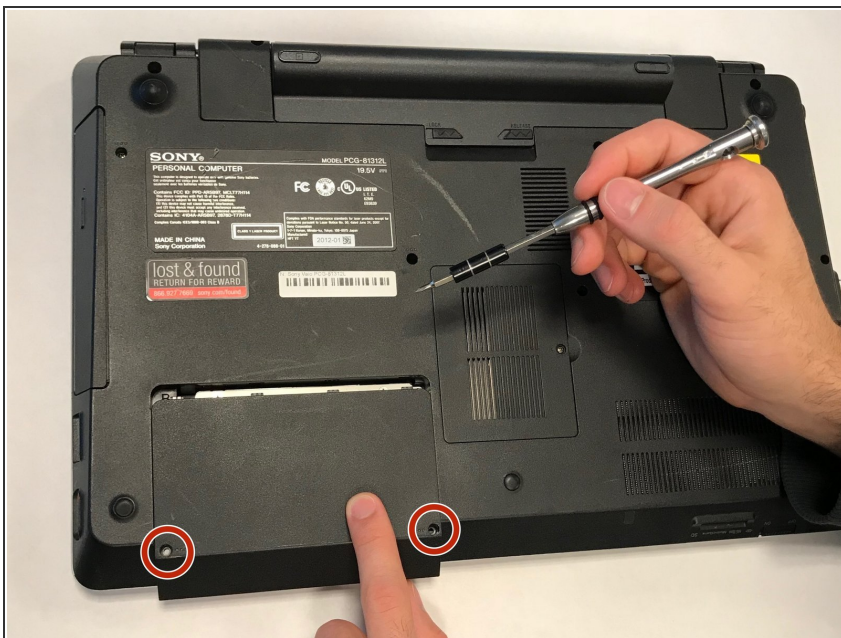

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Hard Drive

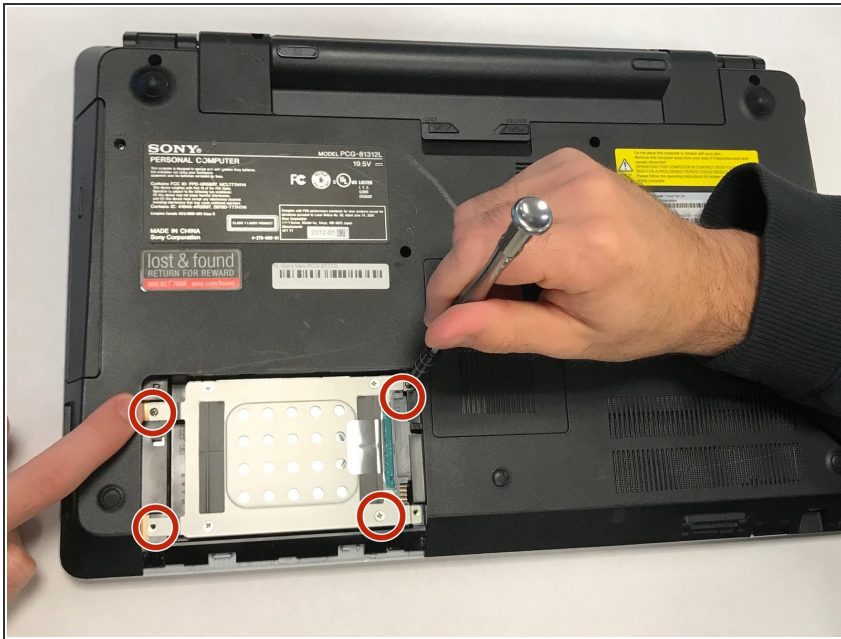

- Find the hard drive of your laptop.

Step 2

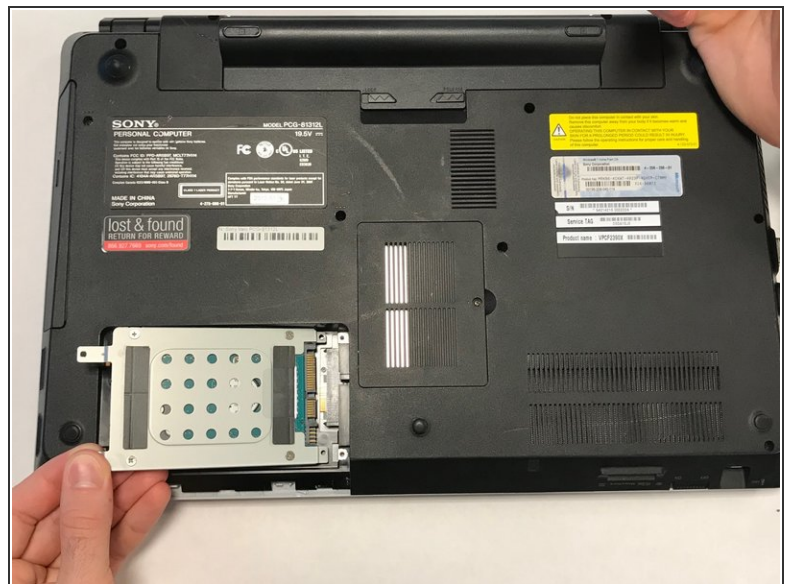

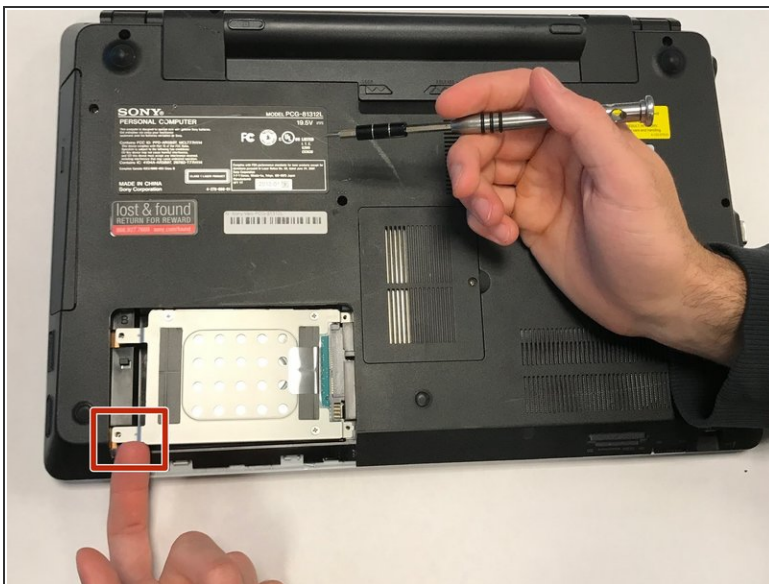

- Unscrew the cover and remove.

Step 3

- Remove the screws keeping the hard drive in place.

Step 4

- Lift the hard drive carefully and replace with a new one.

To reassemble your device, follow these instructions in reverse order.
