Step 3
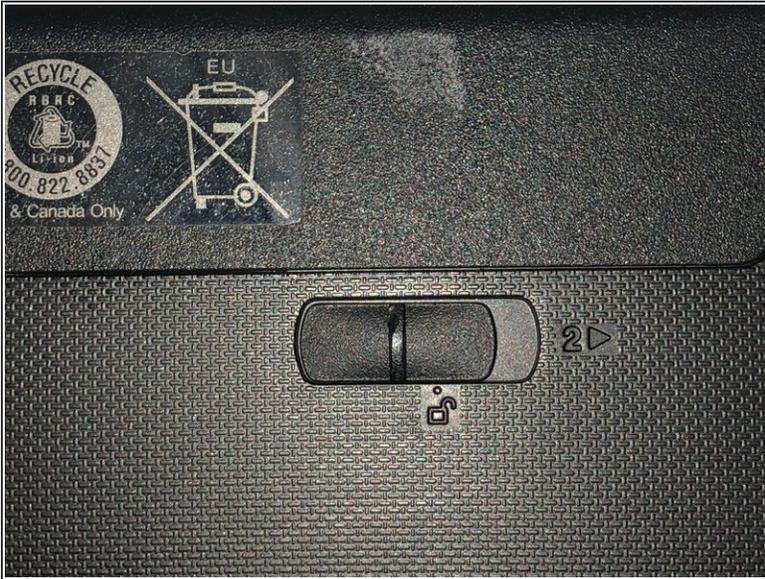

- Slide and hold the spring-loaded battery latch on the other side (right) while sliding the battery out of the computer.

- Grab new Lenovo S20-30 battery for replacement.

Step 4 — Keyboard
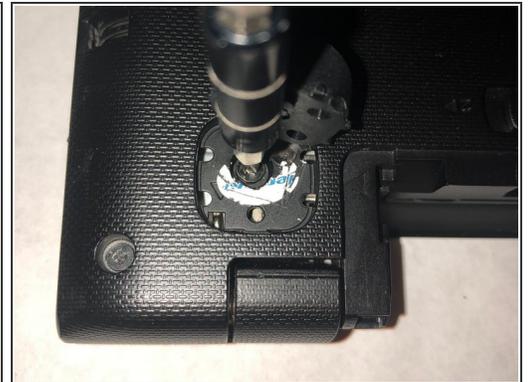

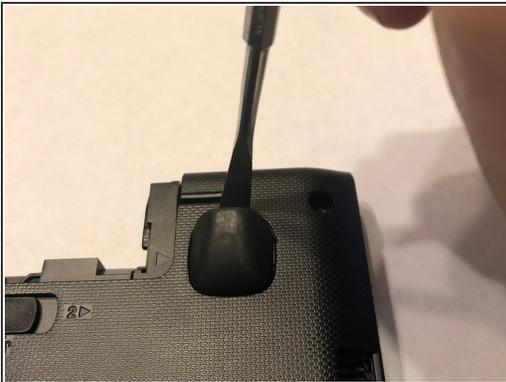

- Remove the two front rubber feet using a long metal spudger.

- Use your Phillips #0 screwdriver to remove the two M2.5 x 5mm flat-head screws located underneath the pads.

Step 5

- Use the Phillips #0 screwdriver to remove the nine M2 x 4mm flat head screws located on the outer edges on the back of the laptop.

- ⓘ Make sure to keep these screws separated from future screws that will be disassembled throughout this process.

Step 6

- Use the long metal spudger to pry open the bottom half of the laptop.

- Gently lift the cover off to reveal the motherboard.

Step 7
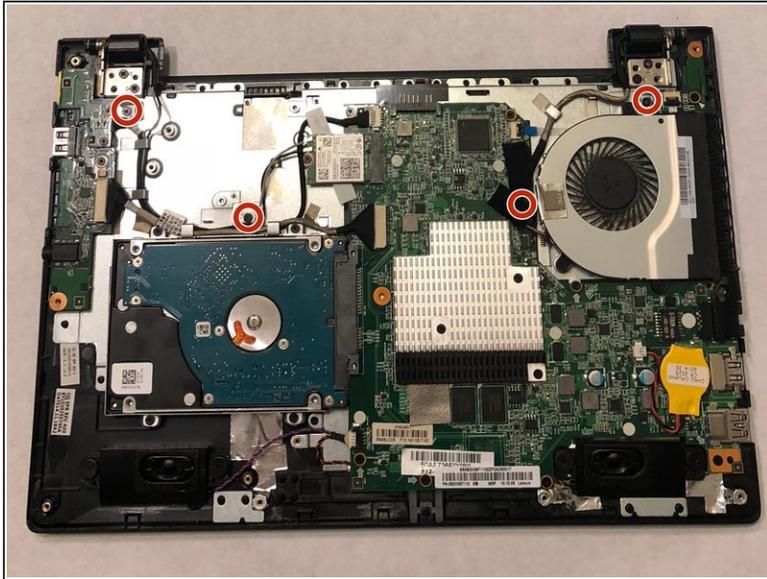

- Remove the four M2 x 3mm flat-head screw using a Phillips #000 screwdriver.

Step 8
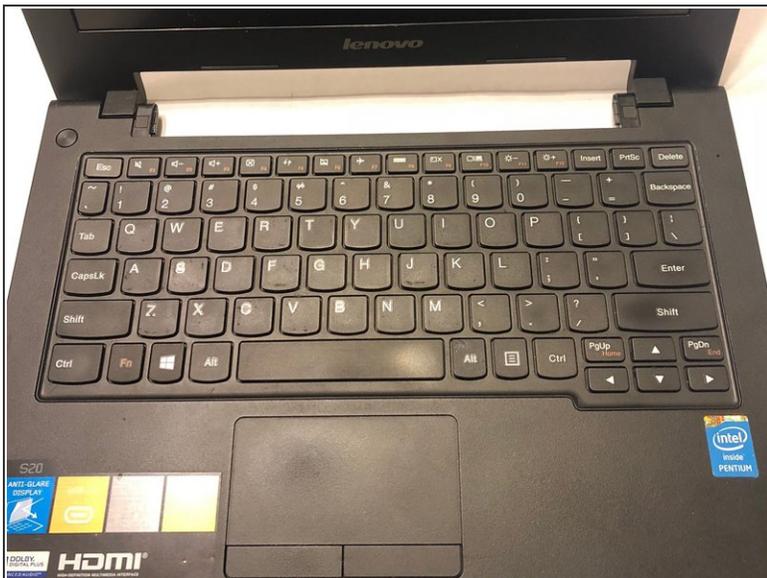

- Flip over laptop and open the lid to have access to the keyboard.
- Use a plastic opening tool to pry apart the keyboard.
