Step 1 — Charging Port

- Remove SIM card tray from the device with a plastic opening tool.
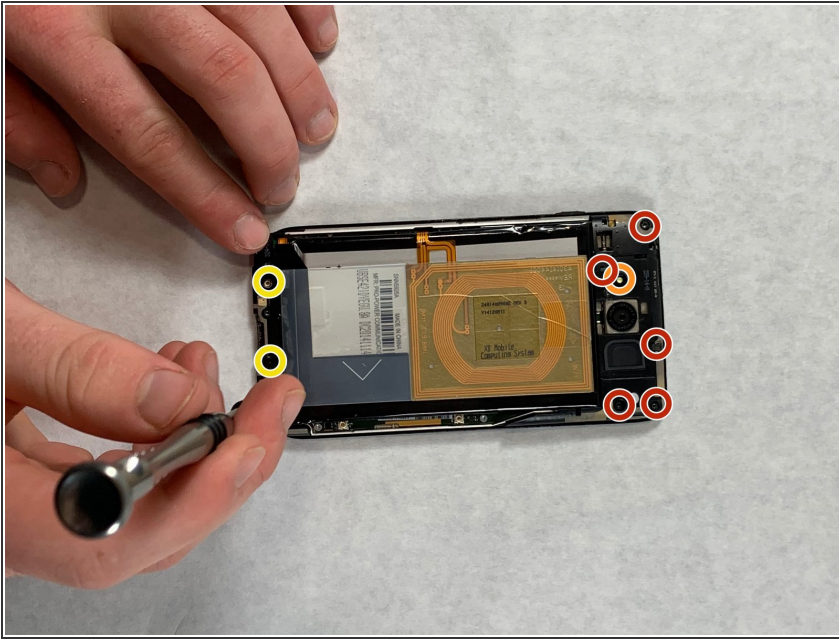

Step 2

- Once SIM card tray is removed press the spudger between the plastic case and the frame of the device until you hear a snap.

- Work your away around the device until all the plastic clips are undone.

⚠ Be gentle with the plastic to make sure it doesn't break.
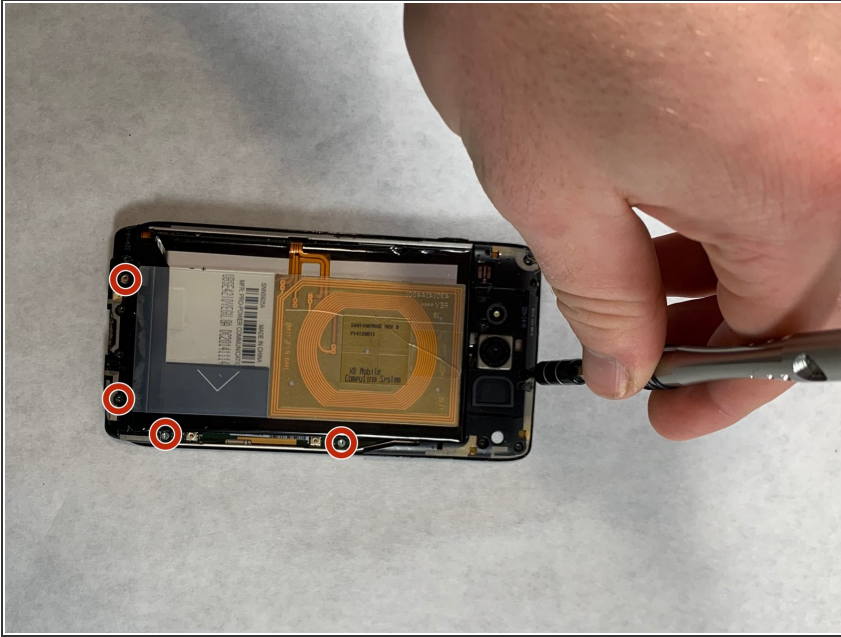

Step 3

- Remove the five screws on top of the device with a T5 Torx.

- Remove the single screw holding the camera with a T4 Torx.

- Remove the two screws on the bottom of the device with a T5 Torx.

Step 4

- Once the screws are removed, use a plastic spudger and lift up the two plastic pieces that were secured by the screws.

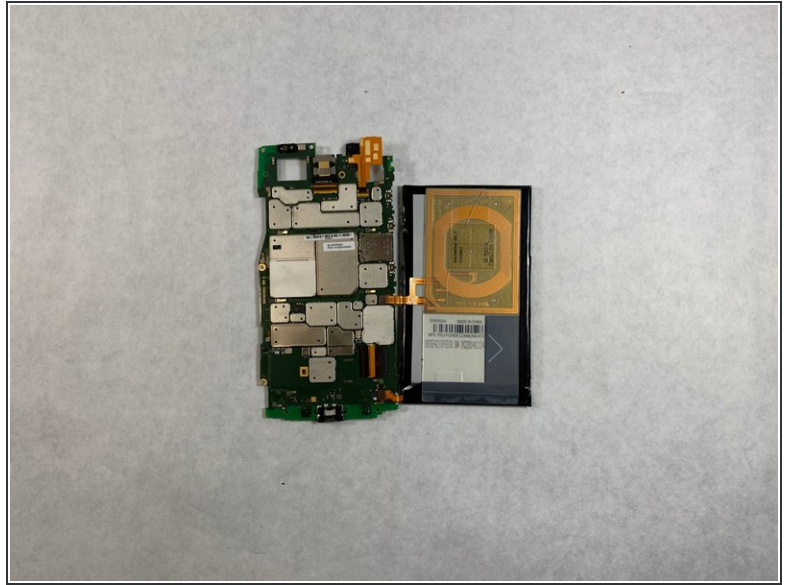

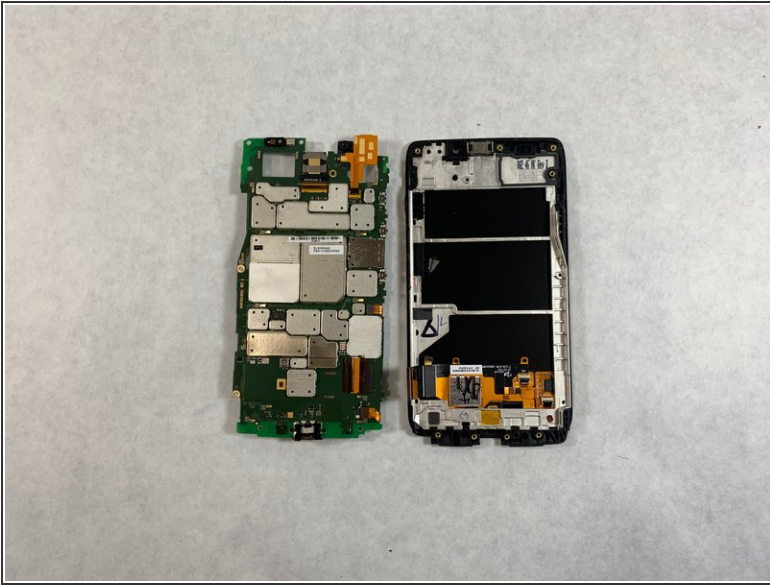

Step 5

- Remove the four T5 Torx screws securing the motherboard.

Step 6

- Gently pry the motherboard out of the frame of the device.

Step 7

- Once the motherboard is free flip it over on its back so all the components are showing.

Step 8

- To fully replace the charging port you need to desolder the port and solder a new one in.

To reassemble your device, follow these instructions in reverse order.
