

# Toshiba CB35-C3300 Heat Sink Replacement

This replacement will show you how to safely replace your heat sink.

Written By: Gabriel Bryan

---

## INTRODUCTION

This guide will show you how to correctly replace your heat sink. This is a fairly straight forward replacement and does not require advanced knowledge or training.

---

### TOOLS:

- [Essential Electronics Toolkit](#) (1)
-

## Step 1 — Heat Sink

- Remove the back cover of the Chromebook and locate the Heat sink and connected fan.

## Step 2

- Unscrew the 4 screws connecting the Heat Sink to the motherboard.

### Step 3

- Unplug the three primary wires attached to the fan from the motherboard.

### Step 4

- Ensure that all cables are detached.

## Step 5

- Carefully remove the Heat sink and fan and set aside.

To reassemble your device, follow these instructions in reverse order.
