How to fix a dead IHome iBT76

Is your IHome iBT76 dead, won't turn on, light up, charge, or always on?

Written By: Salemboot

INTRODUCTION

I bought the iBT76 for myself to go wireless. I like having the extra space and lack of dust. It's a truly great product that lights up spaces. Unfortunately, it quit all of the sudden. Well, it was still working but no lights. I couldn't turn it on/off via the on/off switch.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- Flathead 3/32" or 2.5 mm Screwdriver (1)
