Step 2

- Use an iFixit opening tool to wedge in between the case and body of the laptop.

- Once the tool is wedged in between the case and laptop, slide it around the entire laptop's edge to disengage the retaining clips.

- ⓘ You should hear a popping sound as you slide the iFixit opening tool around the laptop.
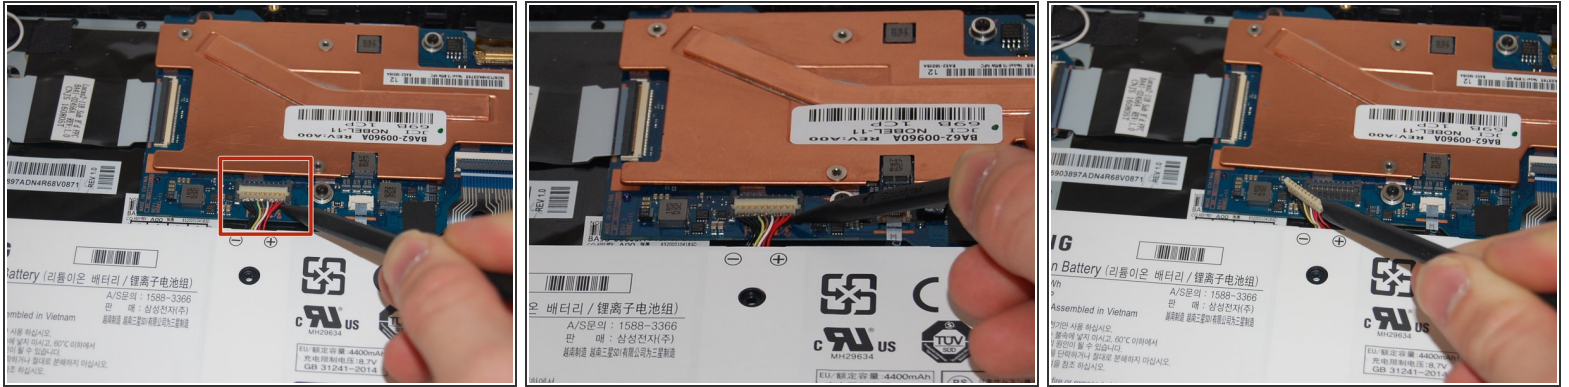

Step 3

- Remove the cover exposing the inside of the laptop.

Step 4 — Battery

- Remove the four 4.6mm screws with the Phillips #00 screwdriver.

This document was generated on 2020-11-28 07:28:10 AM (MST).

Step 5

- Use the spudger to pry underneath the cable and gently lift the connector up.
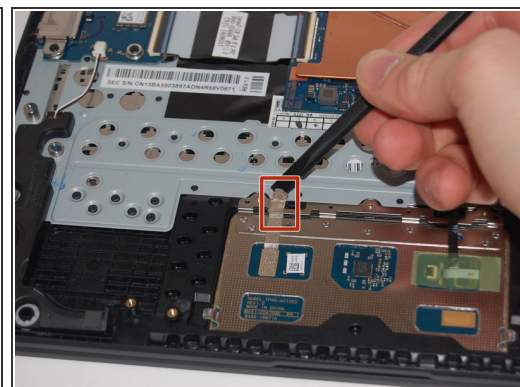

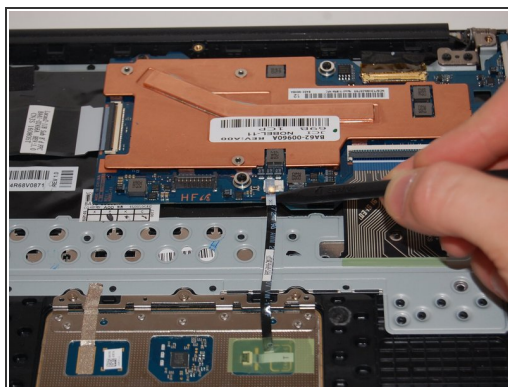

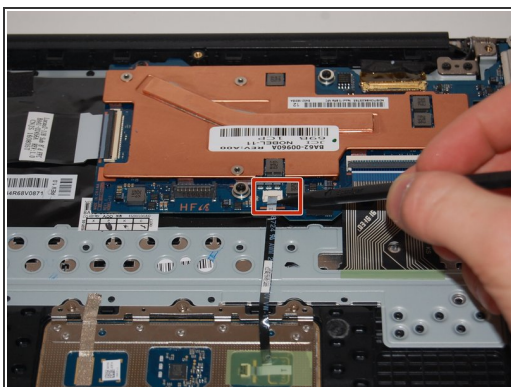

Step 6

- Lift the battery up and out of the case.
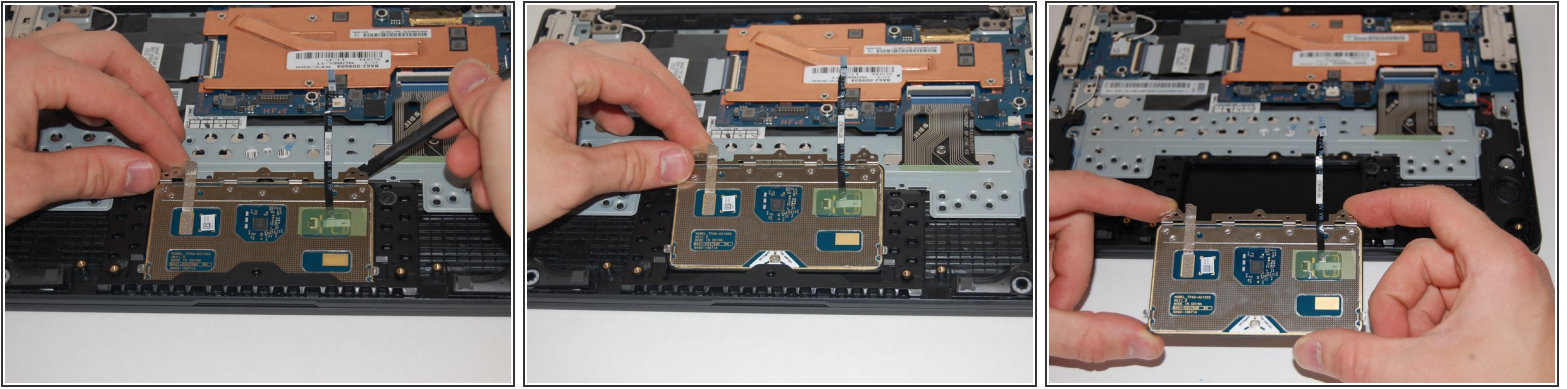

Step 7 — Track pad

- Remove the three 2.3mm screws along the top of the trackpad using a Phillips #00 screwdriver.

Step 8

- Remove the ribbon cable by lifting it out of the connector.

- Lift the grey adhesive tape.
