

# sonyo pro extraX multiverse projector bulb replacement

## Replacement

replacing a spent or defective bulb

Written By: Matt Block

## Step 1 — bulb replacement

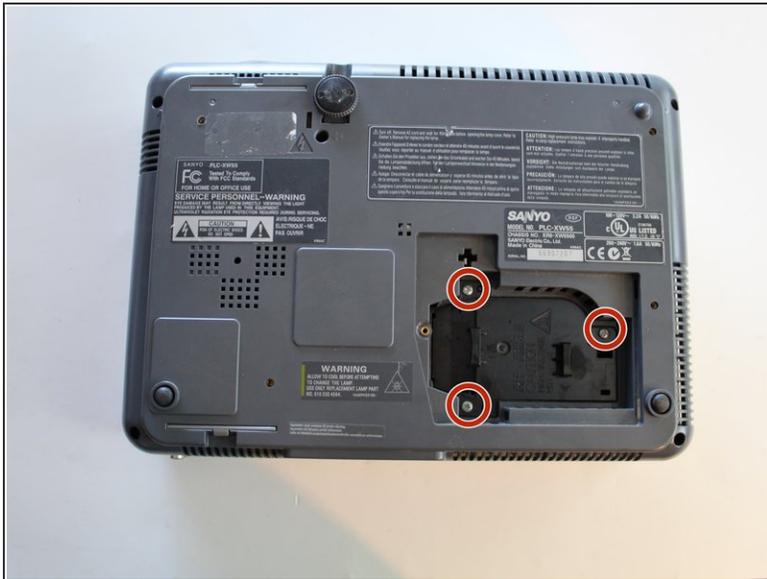

- Remove one 9mm screw with a Phillips 2 screwdriver.

## Step 2

- Use a spudger to lift up the panel, then set it off to the side.

## Step 3

- Remove three 11mm screws with a Phillips 2 screwdriver.

## Step 4

- Pinch on the two plastic clips and lift up to remove the bulb completely.

To reassemble your device, follow these instructions in reverse order.
