INTRODUCTION

Have a loose turret on your Sony Cyber-shot DSC-F828 camera? This guide will show you how to successfully repair that turret so your photo-taking skills can return to optimum performance. A shock-free mat or a grounding bracelet is also recommended when fixing this particular device.

Be sure to leave the lens cap on to avoid scratching the lens.

🔧 TOOLS:

- J00 JIS Screwdriver (1)

Step 1 — How to Fix a Loose Turret on a Sony Cyber-shot DSC-F828

- Slide the button back to open the battery cover.

Step 2

- Pull back on the tab to release the battery.

- Pull the battery out, then close the lid.

Step 5

- Remove the screw on the bottom of the turret using a JIS #00 screwdriver.

Step 6
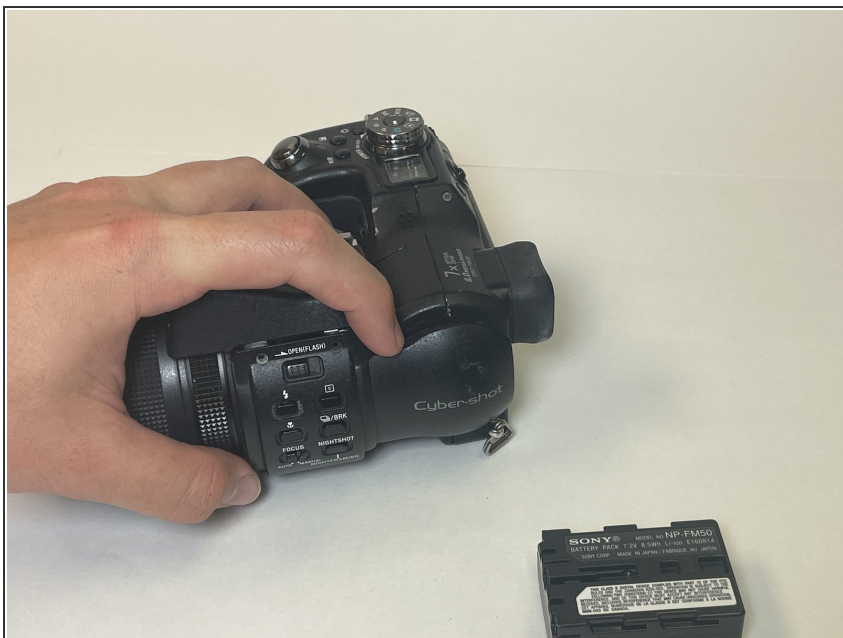

- Carefully pull the face plate off and lay it down.

⚠ There is a cable attached to the plate that should not be removed.
