

# Motorola V60s Button Key Pad Replacement

This guide will describe how to replace the...

Written By: Eric Freeman

## INTRODUCTION

This guide will describe how to replace the numbered cover buttons in the in-hand partition of the Motorola V60.

### TOOLS:

- [iFixit Opening Tool](#) (1)
- [Spudger](#) (1)
- [T6 Torx Screwdriver](#) (1)

### PARTS:

- [Motorola V60 Button Key Pad](#) (1)

## Step 1 — Battery

- Push in release lever towards top of phone, then use blue spudger to pry case off.
- After case is removed from the back of the phone, you can simply use your hands to take it the rest of the way off.
- Set cover aside in a safe location.

## Step 2

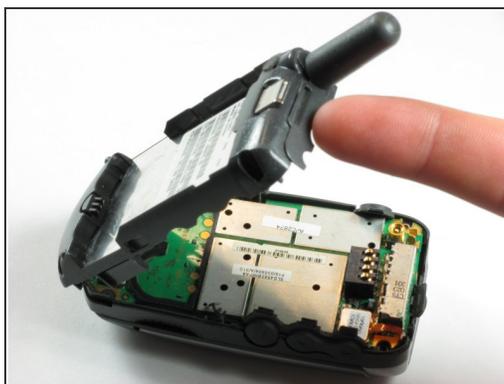

- Carefully grab battery towards bottom of phone.
- Lift from bottom and take out of phone, set aside in a safe location.

### Step 3 — Logic Board

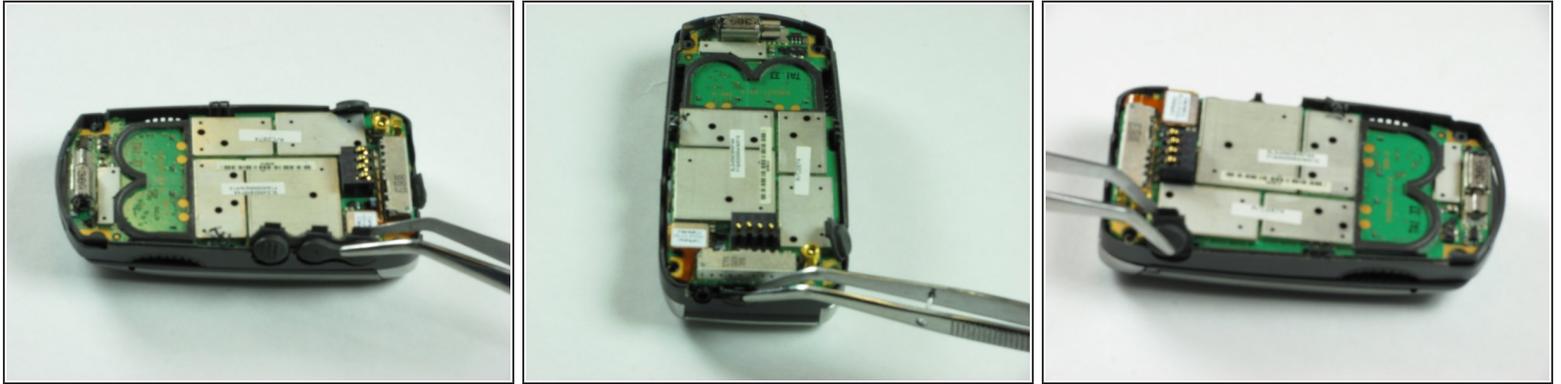

- Unscrew four corner screws with T6 screwdriver.
- Note: The two top screws are short and silver. The two bottom screws are black and long.

### Step 4

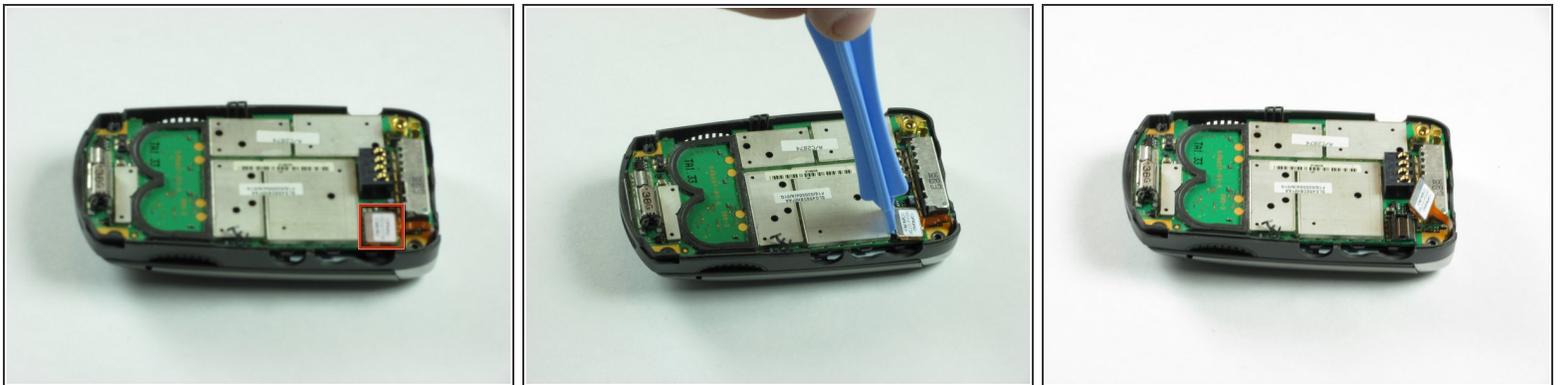

- Use a spudger to gently pry off back chassis. Wedge the spudger in crevice between back panel and phone and lift.

## Step 5

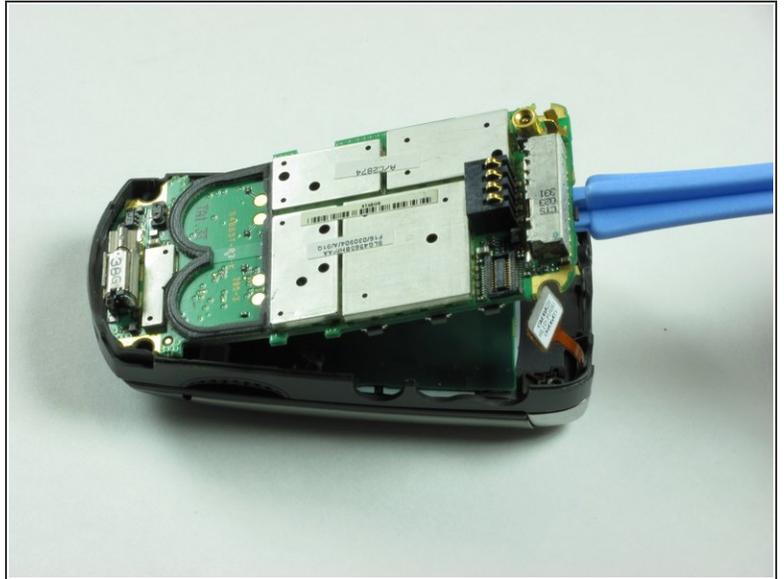

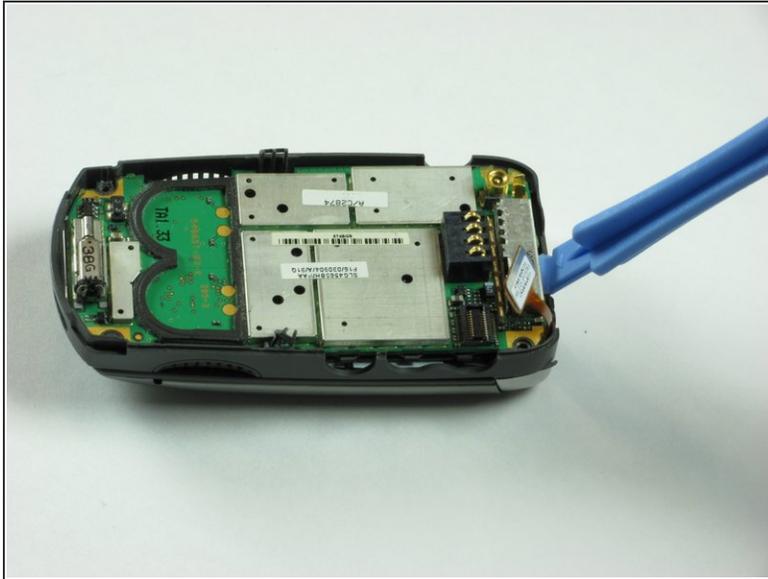

- Starting from left side of phone, remove side buttons and place aside.
- Note: There should be three buttons. One on each side, and the top.
- Return phone to starting orientation when done.

## Step 6

- Gently remove orange ribbon cable by prying up with spudger.

## Step 7

- Use a spudger to pry up logic board by wedging in between logic board and chassis and lifting.
- Note: Orange ribbon cable is fragile and can be broken.

## Step 8 — Button Key Board

- Insert spudger under button board and gently lift, set aside.

## Step 9 — Button Key Pad

- Life button keypad with spudger and set aside.

To reassemble your device, follow these instructions in reverse order.
