## INTRODUCTION

Step-by-step guide for removing/replacing keypad.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tool](#) (1)
-

## Step 1 — Battery

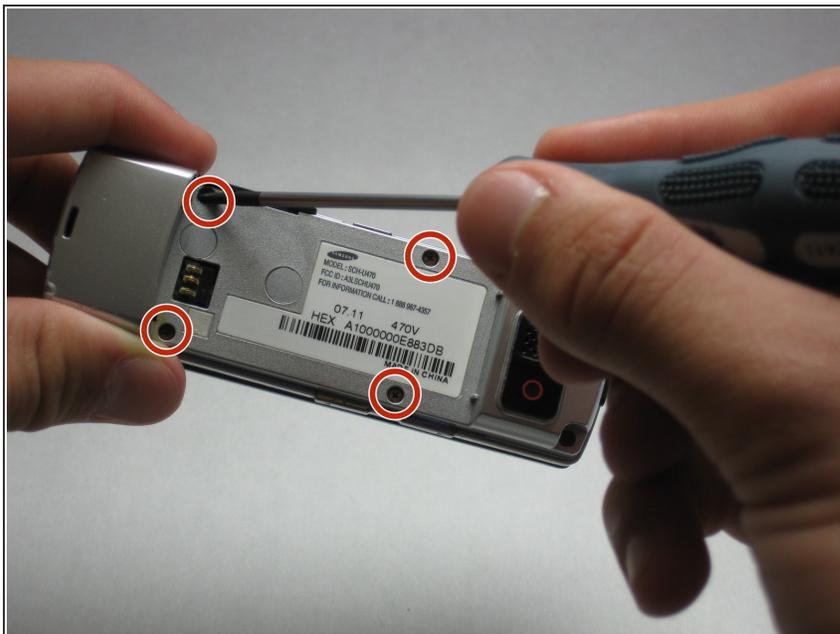

- Press and hold down the button on the bottom side of the phone with your finger.

## Step 2

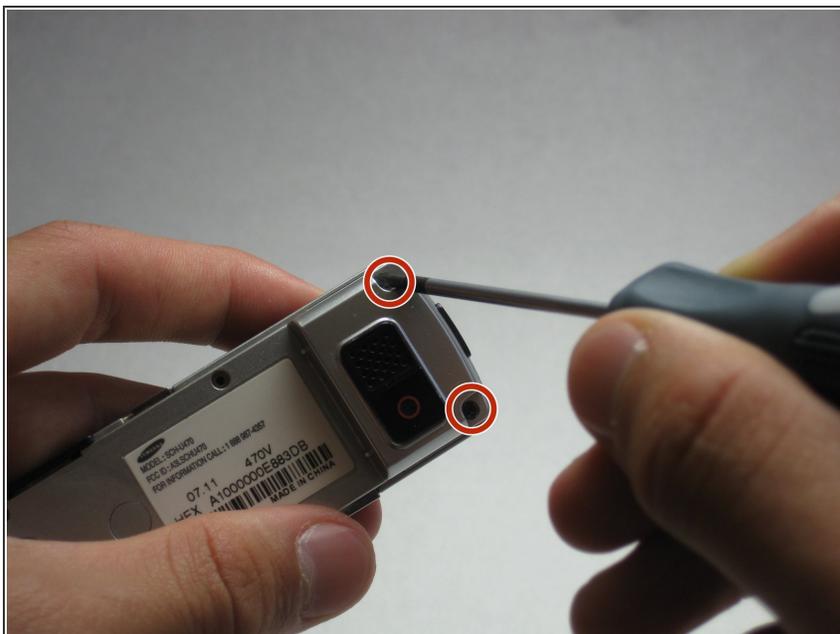

- While holding the button down, remove the back cover of the phone.

### Step 3 — Camera/Speaker

- Remove the four screws from the back of the phone using a Phillips #00 screwdriver.

### Step 4

- Remove the two 7.3 mm screws from the camera and the speaker at the bottom back plate of the phone using a Phillips #00 screwdriver.

## Step 5

- Locate the USB port (where the charger can be plugged in). Using the iFixit opening tool, open the phone cover.

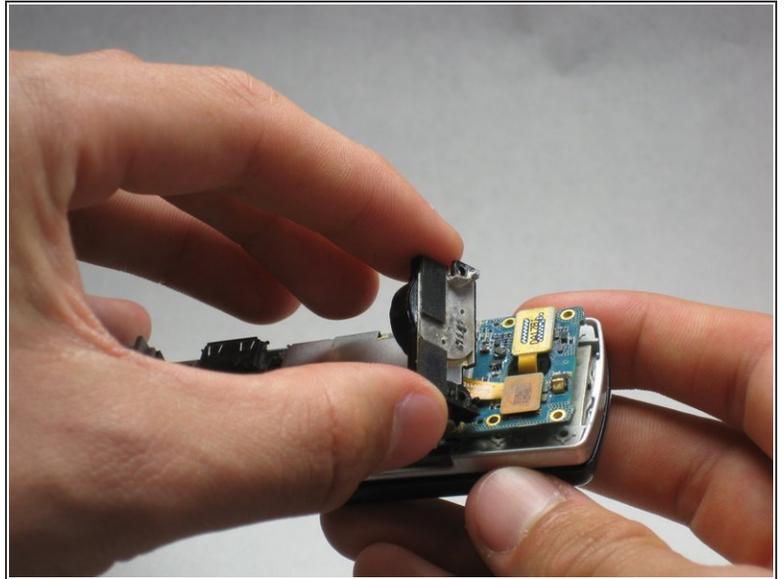

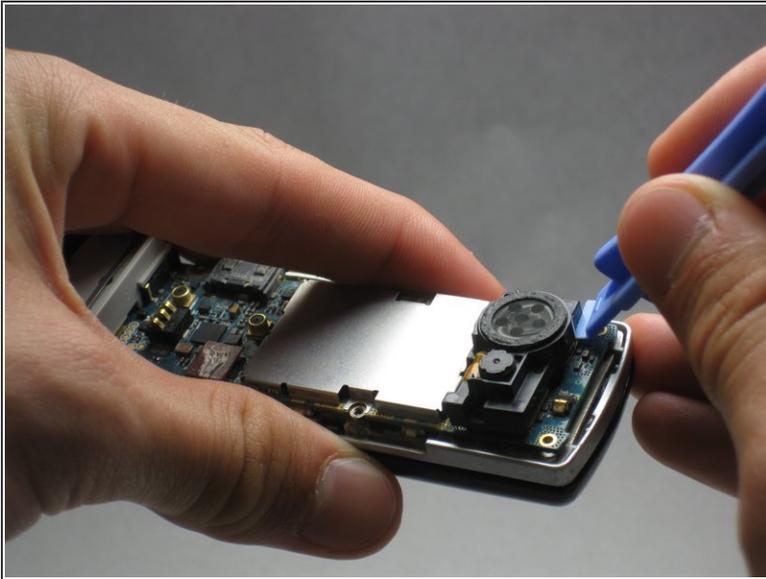

**⚠ Failure to open USB port cover at this stage may result in damaging the device.**

## Step 6

- Remove the 5.5 mm screws from both sides of the camera/speaker with a Phillips #00 screwdriver.

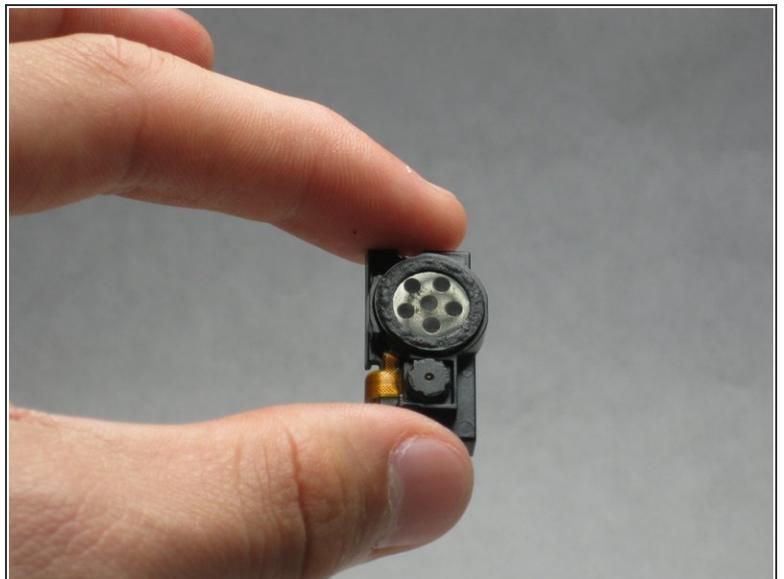

## Step 7

- Use the iFixit opening tool to remove the camera/speaker from the motherboard.

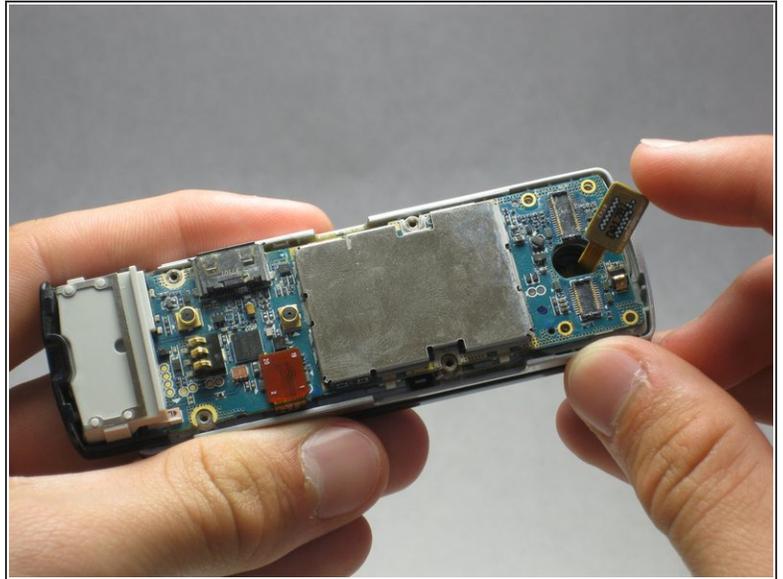

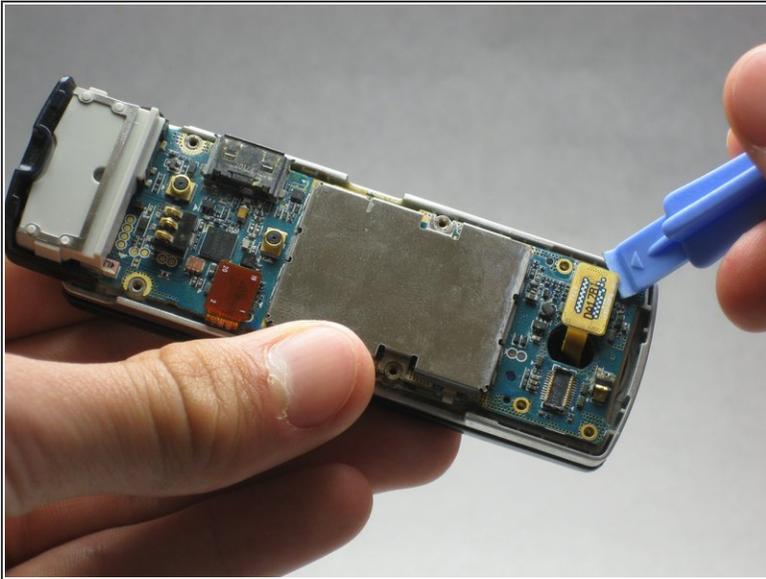

⚠ Practice caution to prevent damage to the attaching ribbon.

## Step 8

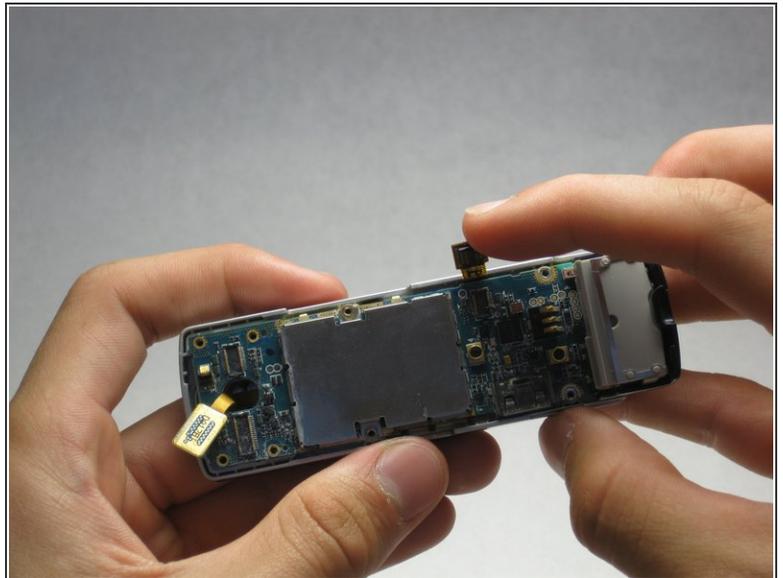

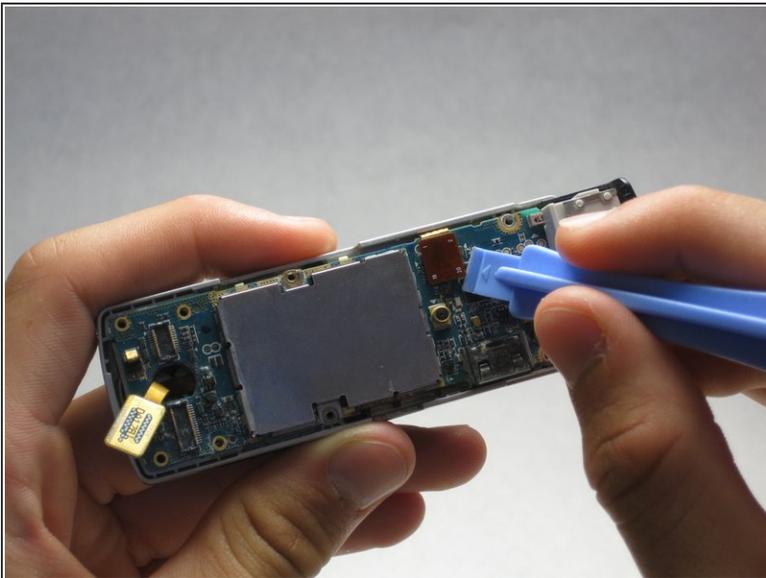

- Use the iFixit opening tool to gently pry the camera/speaker off.

## Step 9 — Motherboard

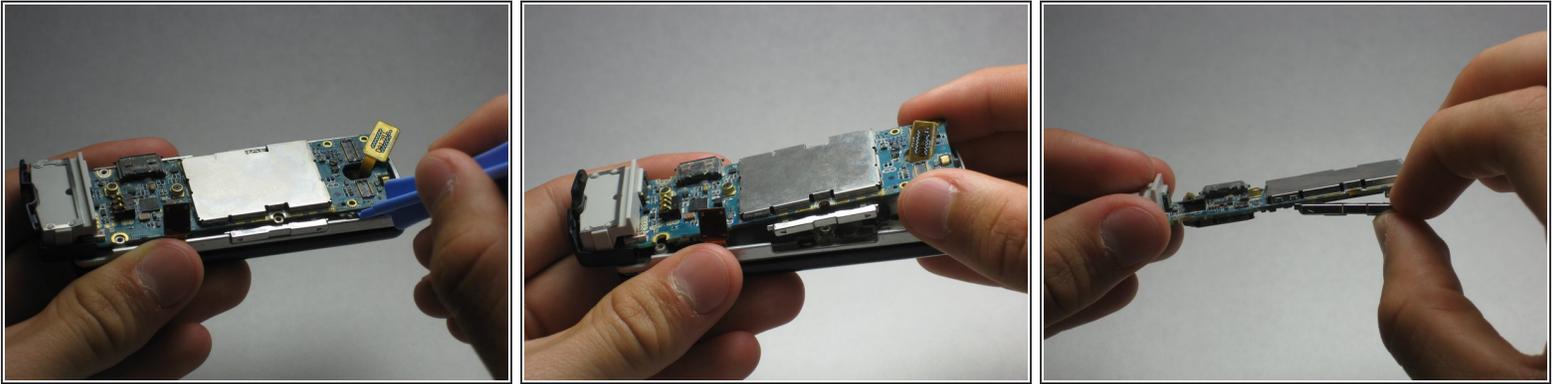

- Use the iFixit opening tool to remove the yellow tab on the motherboard.

## Step 10

- Use the iFixit opening tool to remove the other orange tab to free the motherboard.

## Step 11

- To completely remove the motherboard, use the iFixit opening tool to leverage it up, then use your fingers to pull it out.
- ⓘ Do not be alarmed if the volume and hold buttons are removed from the motherboard.

## Step 12 — Keyboard

- Open/swivel the phone so the back of the LCD panel is visible.
- Use the iFixit opening tool to pry the keypad from the hinge on the back of the device.
- ⓘ A moderate amount of force may need to be applied.

To reassemble your device, follow these instructions in reverse order.
