INTRODUCTION

Prereq only for logic board.

TOOLS:

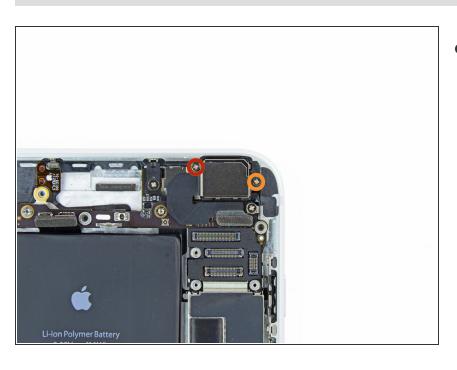

- Tweezers (1)
- Spudger (1)
- Phillips #000 Screwdriver (1)

Step 1 — Rear Facing Camera

 Use a pair of tweezers to peel back the piece of tape covering the hidden screw securing the rearfacing camera bracket to the rear case.

Step 2

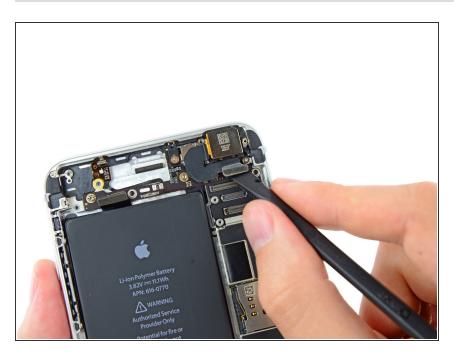

- Remove the following screws securing the rear-facing camera bracket to the rear case:
 - One 1.7 mm Phillips #00 screw
 - One 2.3 mm Phillips #00 screw

Step 3

 Lift and remove the rear-facing camera bracket off the rear-facing camera.

Step 4

 Use the flat end of a spudger to disconnect the rear-facing camera connector from its socket on the logic board.

Step 5

 Carefully lift and remove the rearfacing camera out of the iPhone.

To reassemble your device, follow these instructions in reverse order.
