INTRODUCTION

This guide will give you step-by-step instructions on how to replace the rotating lens cover on your Contour Roam2. Follow this guide if the lens been scratched or damaged.

⚒ TOOLS:

- Phillips #000 Screwdriver (1)
- Spudger (1)

This document was generated on 2020-11-24 03:45:20 PM (MST).

Step 1 — Rotating Lens

- Using the phillips head screwdriver (PH000) locate and remove the 4.45mm (.175in) screw by the 180 degree graphic on the metal ring.

- ⚠ The screws in the camera are very small and can strip very easily. Apply consistent pressure when removing screws.

Step 2

- Rotate the metal ring counterclockwise until completely removed.

Step 3

- Use a spudger to pry up the black rubber ring around the lens cover.

⚠️ The black rubber ring is vey thin and can easily tear. Use caution when removing.

Step 4

- Remove and replace the lens cover.

To reassemble your device, follow these instructions in reverse order.
