

Leapfrog My Own Leaptop Keyboard Buttons Replacement Guide

Access, cleaning and replacement of keyboard buttons.

Written By: Jonathan Fitzer

INTRODUCTION

The step by step guide is designed to assist with button replacement of the Leapfrog My Own Leaptop.

TOOLS:

۶

- Phillips #1 Screwdriver (1)
- Plastic Opening Tool (1)
- Tweezers (1)

Step 1 — Battery

• Flip over device so that back portion of the device is facing you.

Step 2

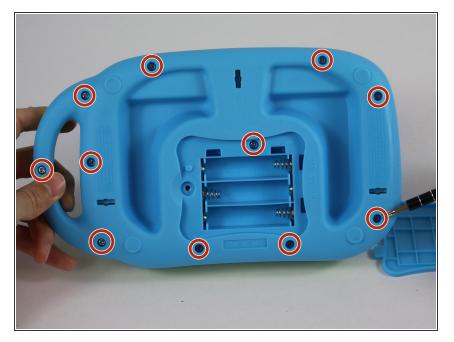

- Unscrew the one 10mm screw that holds the battery cover in place with a a PH1 phillips head screwdriver.
- Please note that the screw cannot be removed as it is attached to the battery cover.

- Carefully pry the batteries out with a plastic opening tool prying from the non spring side.
- Remove the three AA batteries.
- (i) Note the direction of the batteries for when reassembling.

Step 4 — Keyboard Buttons

 Remove the eleven 10mm screws from the back of the device with a a PH1 phillips head screwdriver.

- Carefully remove back of the device.
- Make sure not to rip the wires when lifting the cover off.

Step 6

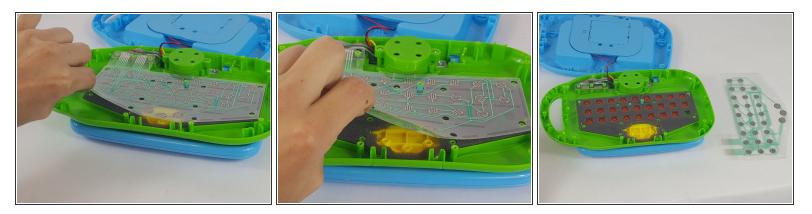

- Remove the three 10mm screws from the upper left hand corner white plastic piece with a PH1 phillips head screwdriver.
- Unscrew the five 4mm screws from the plastic membrane with a PH1 phillips head screwdriver.

• Remove the white plastic piece and place it to the side.

Step 8

- Gently grab the membrane and peal it upwards.
- Carefully remove the membrane and set it to the side.
- From this step you can also clean the membrane of any residue with a lightly dampened paper towel.
- Ensure that the membrane is completely dry before reassembly.

Gently lift and remove the foam piece

Step 10

- From here, each button is able to be removed for cleaning or replacement.
- Using a tweezers or needle nose pliers, remove the necessary pieces from the device.

To reassemble your device, follow these instructions in reverse order.
