# INTRODUCTION

Use this guide to remove the back cover and access the motherboard.

## TOOLS:

- iFixit Opening Tools (1)

## PARTS:

- Sony Ericsson W580i Back Cover (1)

This document was generated on 2020-11-14 04:15:48 AM (MST).
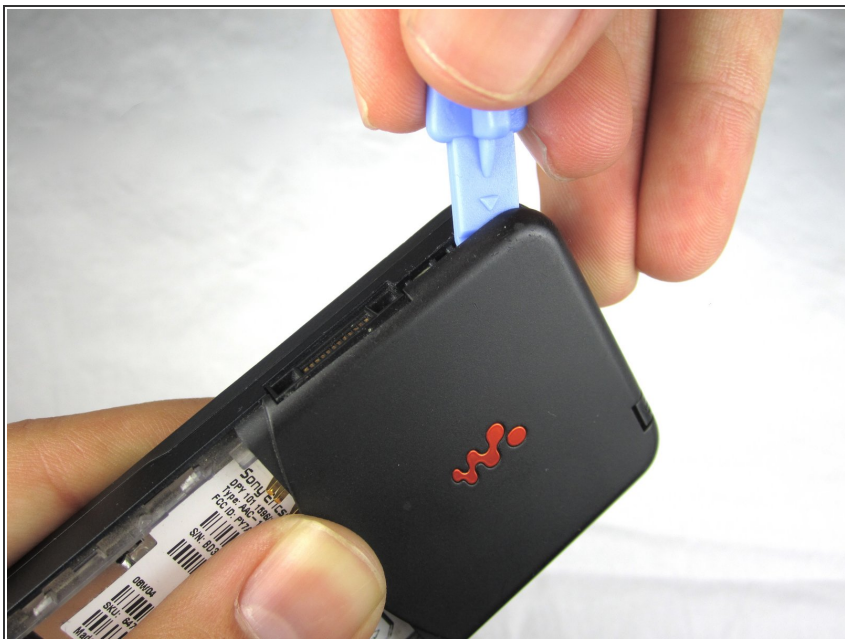

## Step 1 — Battery

- Hold the phone with the screen facing down. Push the back cover firmly down and slide it towards you.

- The panel will slide down about 2mm.

- Lift the panel away from the phone.

## Step 2

- Lift the battery out from the bottom edge.

This document was generated on 2020-11-14 04:15:48 AM (MST).

## Step 3 — Back Cover

- Insert the edge of an opening tool between the back cover and the phone body on the top edge (not to be confused with the edge where the phone slides).

- Pry the back case off of the phone working your way around the edges until the panel is freed from the phone.

⚠ Be careful when pulling the spudger down the side by the charging port. The plastic cover may bend or snap.

## Step 4

ⓘ While removing the back cover do not lose the power button. It is held in place by the back cover and may fall off during removal.

- Pull the back cover away from the phone.

- Remove the power button if it has not already come off.

To reassemble your device, follow these instructions in reverse order.
