

Martian Victory Lithium Battery Replacement

Detailed images and descriptions will be...

Written By: David Miller

INTRODUCTION

Detailed images and descriptions will be provided to show the user how to replace the lithium battery.

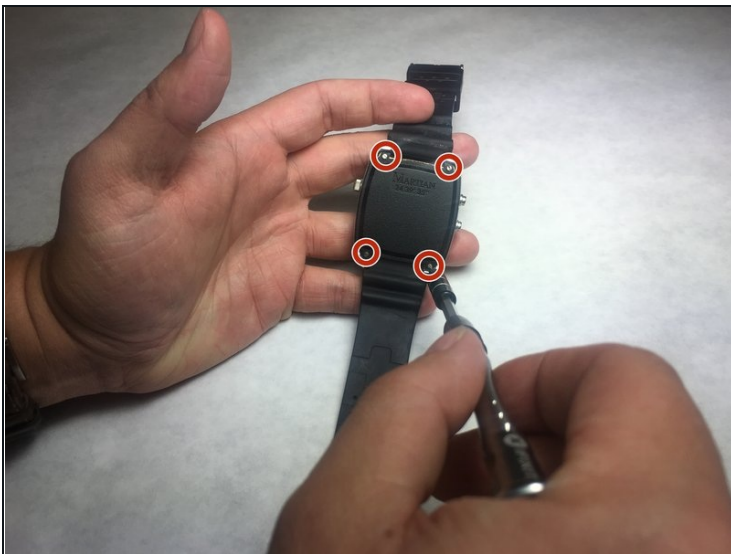

TOOLS:

[1.5 mm Flathead Screwdriver](#) (1)

[iFixit Opening Tool](#) (1)

[Soldering Iron 60w Hakko 503F](#) (1)

Step 1 — Back Plate

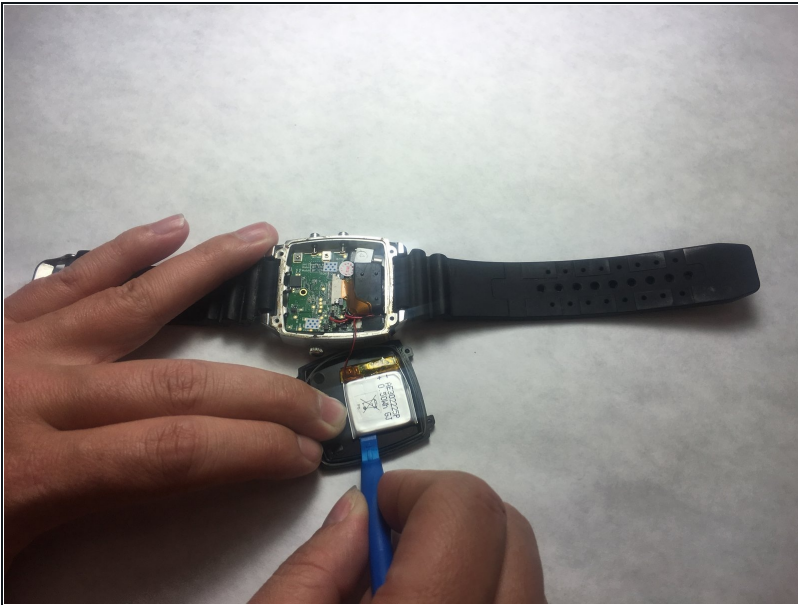

- Unscrew the four 3.4 mm flat head screws

Step 2

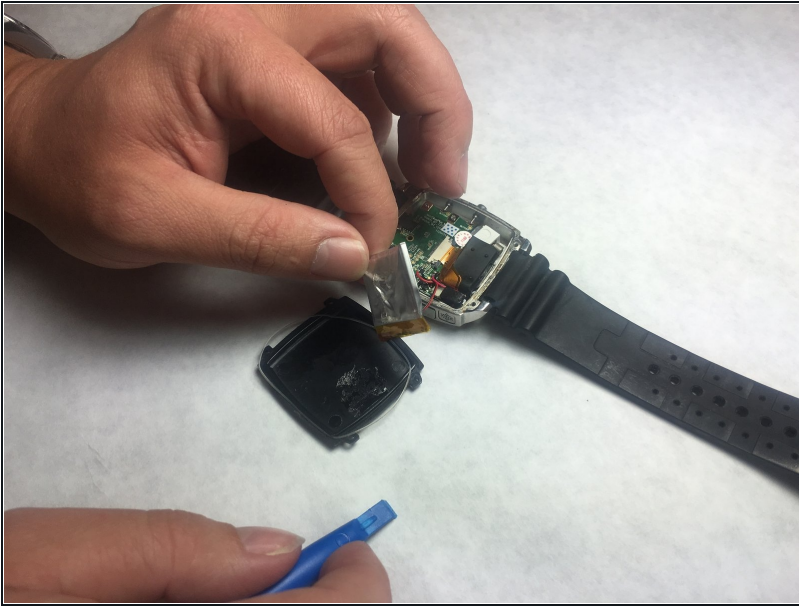

- Carefully lift the back plate off the watch. You will notice a lithium battery and rubber gasket attached to the back plate.

Step 3 — Lithium Battery

- ① If not replacing lithium battery, skip down two steps.
- Using the plastic removal tool, pry the battery from the backing plate. The battery is simply attached with glue.

Step 4

- Desolder the battery connections from the motherboard. Learn how to solder components [here!](#)

To reassemble your device, follow these instructions in reverse order.
