Step 1 — Front Case

- Use a spudger to remove the two screw covers below display.

- Use a screw driver to remove the four Phillips #00 (3.3mm) screws at corners of the display.

Step 2

⚠️ **Caution:** Wires and ribbon connect the front case to the main body. Exhibit care when separating front case from the main body as to not break the connections.

- **Note:** Side buttons may fall out when removing the front case. Do not misplace them.

- **Note:** Each side button will only fit in the side that it came from.

- Insert a spudger between the black and grey casings and gently spread them apart.

- Work around the device gradually, opening the gap further.

Step 3

⚠️ **Caution:** The wires and ribbon connector can break easily. Exhibit care when removing them.
- Use the spudger and lift upward to disconnect the ribbon from the main part of the phone.

- Carefully remove any parts stuck to the front case such as speakers.

Step 4 — Camera
- Disconnect the ribbons on both sides of the camera by prying them up with a spudger.

Step 5

- Hold the wiring out of the way and pull up with a spudger behind the camera.
- The camera unit should come unglued and separate from the phone.

To reassemble your device, follow these instructions in reverse order.
