INTRODUCTION

This repair guide will show you the best step by step procedure of how to replace your power button in your Panasonic ARC ES-LT3N. The process is fairly easy and you only need a one tool!

TOOLS:

Phillips #00 Screwdriver (1)

Step 1 — Back Casing

Flip the razor over so the back is facing you.

Step 2

Using a Phillips #00 screwdriver, remove the 6 mm screw just above the charger port.

Slide the plastic cover at the bottom of the razor downward to remove.

Guide ID: 86768 - Draft: 2017-08-17

- Lift up the rear casing from the bottom of the razor.
- (i) This may require you to gently pry it apart with you fingers.
- Lift up the rear casing from the sides of the razor.
- Pull rear casing up and off razor.
- ♠ Be careful not to break any plastic!

Step 5 — Battery

 Using the Phillips 00 driver bit, remove six screws (12mm) from the battery case.

Step 6

Remove battery case.

- Remove old battery by lifting the battery up and left.
- (i) There are plastic brackets holding the battery on the right. Removing up and left ensures that the brackets will not be damaged and the battery will not come loose.

Step 8 — Power Button

Remove the 8 mm screws directly below the lock switch.

Guide ID: 86768 - Draft: 2017-08-17

Push the lock switch upward and remove the 6 mm screw hidden beneath.

Step 10

Remove the lock switch by sliding it downward until it is out of place.

Guide ID: 86768 - Draft: 2017-08-17

- Starting from the bottom, lift the front casing upward to separate the case from the device.
- Continue to lift the device upward until you can pull the casing off.
- (i) It may take some wiggling or slight bending of the plastic to remove all the way.

Step 12

Remove the button.

To reassemble your device, follow these instructions in reverse order.
