

PalmOne Zire 72 Battery Replacement

Written By: Michelle Medina

- T5 Torx Screwdriver (1)
- Phillips #00 Screwdriver (1)
- Spudger (1)

Step 1 — Battery

Using a T5 Torx screwdriver, unscrew the two 5mm screws located at the bottom of the device.

Step 2

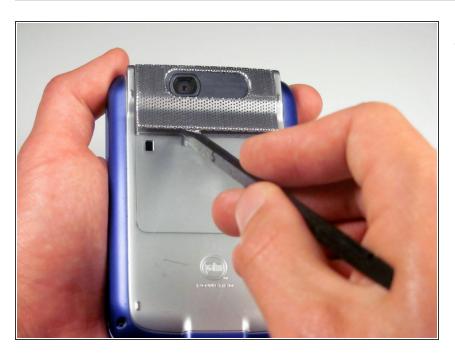

- Peel back the adhesive label below the camera on the rear to reveal a hidden screw.
 - If you peel the entire adhesive off, two holes underneath will be exposed to future damage. Try to preserve the label to reapply later.
 - Alternate Procedure:

Underneath the camera, feel for a depression and cut the sticker directly above the depression to reveal the hidden screw.

 Use a #00 Philips screwdriver to remove the 2.5mm hidden screw.

Step 4

 Use either end of a a spudger to carefully pry off the camera lens mesh cover.

 Using the #00 Phillips screwdriver, remove the two 9mm screws on the top corners of the device.

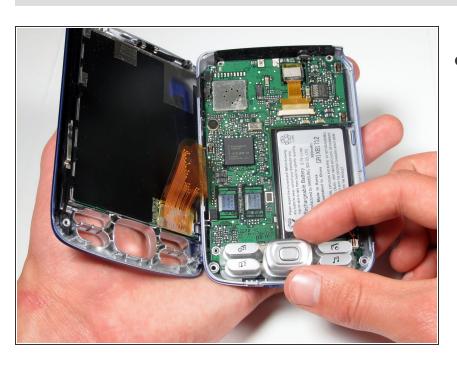

- Spin the phone around so that the headphone jack is facing you.
- Run the flat end of the spudger around the entire edge of the device to gently pry the case off.
 - Gently remove the case to avoid damaging it. Do not try to force the case open.
 - (i) The L shaped latches located on the bottom of the device make it hard to remove the case; you should run the spudger around the device's edges again if you are having problems.

- Remove the cover by lifting it from right to left.
 - This should be similar to the action of the opening of a book.
 - A connector may tear if this is not done carefully. The connector is a brown film connecting the motherboard to the case.

Step 8

 Lift the control pad buttons off of the motherboard.

This document was generated on 2020-11-28 02:33:14 AM (MST).

- Wedge the flat end of the spudger underneath the battery and gently pry it out.
 - Be cautious of the red and black wires on the battery, which may rip easily.
- i The battery may have adhesive holding it to the device.
- The battery connector may rip if the battery is not removed carefully.

Step 10

- Gently disconnect the white component connecting the battery to the motherboard.
 - The connector should be pulled upward.

To reassemble your device, follow these instructions in reverse order.
