

# How to shutdown an iPhone X

The procedure to shutdown an iPhone X differs a little from other iPhones.

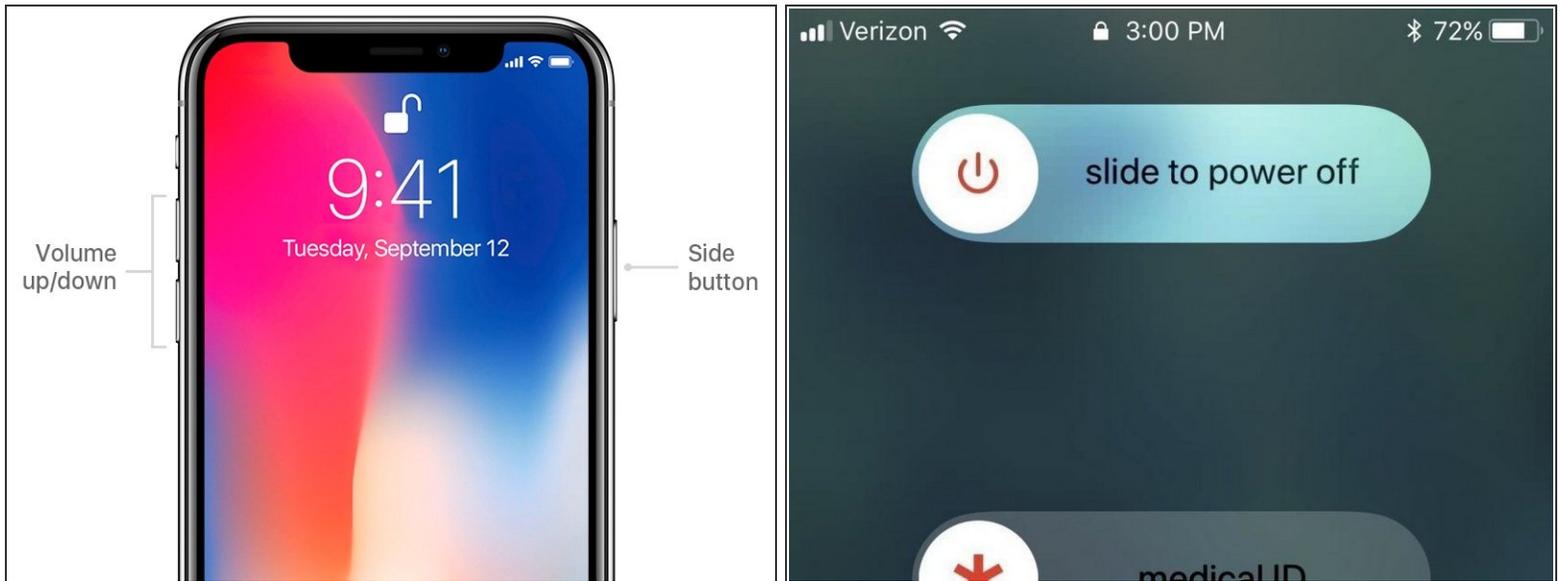

Written By: yvaneck

# INTRODUCTION

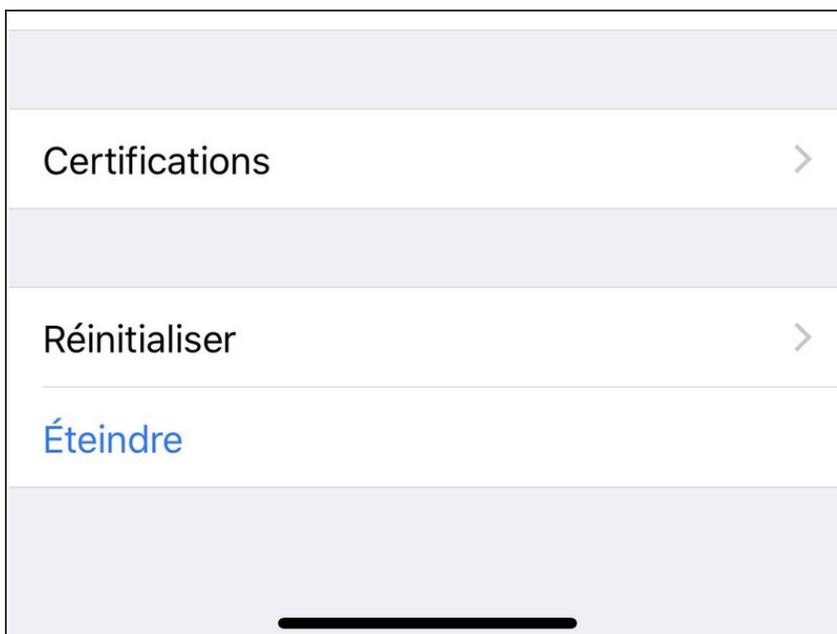

Procedure to shutdown an iPhone X

## Step 1 — How to shutdown an iPhone X

- To turn it off, hold down the side button and one of the volume buttons simultaneously until a slider appears to turn off your iPhone X (There will also be the slider for the medical chart, as well as the slider for an emergency call)
- Then drag the appropriate slider to turn off the iPhone X.

## Step 2

- You can also turn off your iPhone X by navigating to
  - Go to Settings and then to the General section
  - Tap Shut Down at the bottom of the Reset tab.
  - To turn it back on, press and hold the side button for a few seconds
