INTRODUCTION

The battery in a laptop can die due to a number of reasons like age, usage, and heat. This guide will show you how to replace the battery in the Toshiba Satellite L15W-B1320.

TOOLS:

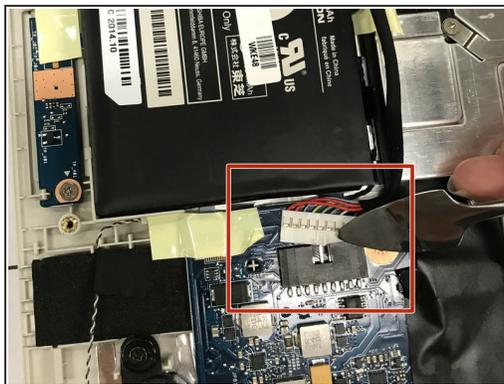

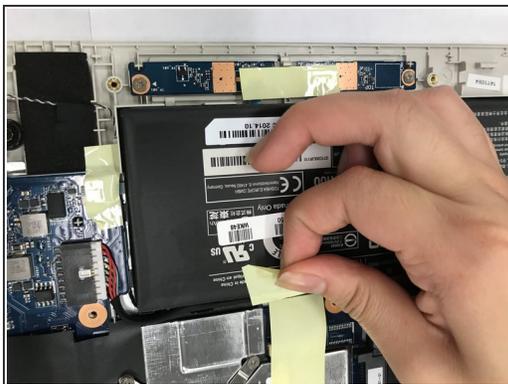

- [iFixit Opening Tools](#) (1)
 - [JIS #0 Screwdriver](#) (1)
-

Step 1 — Battery

- Close the laptop and flip it over so that the base is facing upward.
- Using the JIS #0 screwdriver tip unscrew all 10, M2X4 size screws holding down the lid.
- Using a spudger pry the bottom lid of the laptop from the rest of the laptop.

Step 2

- Remove the yellow tape that connects the battery to the rest of the laptop by simply pulling it off.
- Disconnect the indicated cable from the cable connector by gently pulling on it.
- Lift up the battery carefully.

To reassemble your device, follow these instructions in reverse order.
